

order needed to be replaced, and he stated that he is progressing with replacement. Mr. Johnson further stated, however, that until substantial replacement of the total system is complete, little difference may be seen by customers on the "hill" area of Martin City. Also, Mr. Johnson is reluctant to get involved in substantial replacement projects until the status of the proposed water and sewer district is clearer.

4. Public testimony ran the full gamut of complaints, opinions, and expressions of support on all aspects of the water system. All witnesses agreed on the depth of the problems in Martin City but disagreed substantially in their assessments of the quality of Mr. Johnson's efforts to correct these problems. In this sense, the formation and operation of the water district may be taken as a referendum on Mr. Johnson's management of the Martin City Water Company.

5. On the basis of the whole record, the Commission accepts Mr. Johnson's statements in this matter regarding the need for and progress toward the improvements specified in Supplemental Order No . 4377a.
