PROPRIETARY INFORMATION

APPENDIX A

77. A final measure of size involves revenues. USWC provided a percentage breakdown of total intrastate switched access usage revenue for the 12 months ending June of 1990. These percentages are:

AT&T	78.9
MCI	10.9
AS	5.9
TA	3.1
USS	.8

92. Another supply-side example involves automatic number identification (ANI). AS holds that ANI is not passed to carriers for customers served out of unequal access offices (AS Data Response No. PSC-4). Once more, at least 39 percent of the customer population falls in this category.
