17	
18	
19 1/ Remuneration:	
20 Non-employee Directors are paid \$19,600 per year, effective 12/1/96, plus \$5	-
21 Committee of the Board attended, except those held in conjunction with regula	ar Board meetings.
22	
23 They also receive \$850 per special meeting of the Board, when such special r	meetings are held
24 in addition to the regularly scheduled Board meeting in any one month.	
25	
26 The Company has a Deferred Compensation Plan for non-employee Directors	
27 Directors may elect to defer their payments as Directors until retirement from t	the Board.
28 No compensation was deferred in 2000.	
29 Deferred payments earn interest based on Moody's average Baa Corporate B	lond Rates.
30	
31 The Company has a Stock Compensation Plan for non-employee Directors.	
32 The Plan provides annual grants of 960 shares of the Company's common sto	
33 The Plan also allows Directors to elect to receive any portion of their annual re	etainer in the Company's
34 common stock.	
35 Directors may elect to defer receipt of the stock payment until they cease to b	e a Director of the Company
36 or until such other date the Director elects.	
37 At the end of the deferral period, the Director will be paid for the stock units in	
38 or the equivalent value in cash based upon the market value of the Company'	s common stock at that time.
39 40 All Company Directors closted prior to 12/21/07participated in a pap qualified	ratirament plan (the Basefit
40 All Company Directors elected prior to 12/31/97participated in a non-qualified 41 Restoration Plan for Directors).	remement plan (the benefit
 41 Restoration Plan for Directors). 42 The Plan was implemented in 1986 for all eligible Directors. 	
	tirement
44 It is intended to allow for supplemental income to the Director at the time of re 45 beneficiaries in the event of the Director's death.	
45 beneficiaries in the event of the Director's death. 46 Trust owned life insurance is carried on Plan participants.

Sch. 13	POLITICAL ACTION COMMITTEES / POLITICAL CONTRIBUTIONS
1	
2	The Montana Power Company does not make any contributions to Political Action
3	Committees (PACs) or candidates.
4	
5	There is an employee PAC - Citizens for Responsible Government / Employees of
6	The Montana Power Company (CRG). CRG is an organization of employees and
7	shareholders of Montana Power and its subsidiaries. All of the money contributed by
8	members goes to support political candidates. No company funds may be spent in
9	support of a political candidate. Officers and local representatives of CRG donate
10	their time. Nominal administrative costs for such things as duplicating and postage
11	are paid by the Company. These costs are charged to shareholder expense.

NOTES TO THE FINANCIAL STATEMENTS

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

□ BASIS OF ACCOUNTING

Our accounting policies conform to generally accepted accounting principles. With respect to our utility operations, these policies are in accordance with the accounting requirements and ratemaking practices of applicable regulatory authorities.

□ USE OF ESTIMATES

Preparing financial statements requires the use of estimates based on information available. Actual results may differ from our accounting estimates as new events occur or we obtain additional information.

RECLASSIFICATIONS

We have made reclassifications to certain prior-year amounts to make them comparable to the 2000 presentation. These reclassifications had no material effect on our previously reported consolidated financial position, results of operations, or cash flows.

G FINANCIAL STATEMENT PRESENTATION

The financial statements are presented on the basis of the accounting requirements of the Federal Energy Regulatory Commission (FERC) as set forth in its applicable Uniform System of Accounts. This report differs from generally accepted accounting principles due to FERC requiring the reflection of subsidiaries on the equity method of accounting which differs from Statement of Financial Accounting Standards (SFAS) No. 94 "Consolidation of All Majority-Owned Subsidiaries." SFAS No. 94 requires that all majorityowned subsidiaries be consolidated. The other differences are comparative statements of retained earnings and cash flows and net income per share are not presented.

□ CASH AND CASH EQUIVALENTS AND TEMPORARY INVESTMENTS

We consider all liquid investments with original maturities of three months or less to be cash equivalents, and investments with original maturities over three months and up to one year as temporary investments. At December 31, 1999, all of our investments were available for sale, and their fair value approximates the value reported on the Consolidated Balance Sheet. We had no temporary investments at December 31, 2000.

□ PROPERTY, PLANT, AND EQUIPMENT

The following table provides year-end balances of the major classifications of our property, plant, and equipment, which we record at cost:

	December 31		
	2000	1999	
	(Thousands	of Dollars)	
UTILITY PLANT:			
Electric:			
Generation (including our share of			
jointly owned)	\$ (238,431)	\$ (239,961)	
Transmission	395,218	370,166	
Distribution	597,871	567 , 333	
Other	95 , 625	92,292	
Natural Gas:			
Production and storage	71,659	71,424	
Transmission	167,416	163,968	
Distribution	151,039	147,764	
Other	27,077	30,693	
Total plant	\$1,267,474	\$1,203,679	

We capitalize the cost of plant additions and replacements, including an allowance for funds used during construction (AFUDC) of utility plant. We determine the rate used to compute AFUDC in accordance with a formula established by the Federal Energy Regulatory Commission (FERC). This rate averaged 8.6 percent for 2000 and 7.1 percent for 1999.

We charge costs of utility depreciable units of property retired plus costs of removal less salvage, to accumulated depreciation and recognize no gain or loss. We charge maintenance and repairs of plant and property, as well as replacements and renewals of items determined to be less than established units of plant, to operating expenses.

Included in the plant classifications are utility plant under construction in the amounts of \$1,806,000 and \$3,782,000 for 2000 and 1999, respectively.

We record provisions for depreciation and depletion at amounts substantially equivalent to calculations made on straight-line and unit-of-production methods by applying various rates based on useful lives of properties determined from engineering studies. As a percentage of the depreciable and depletable utility plant at the beginning of the year, our provisions for depreciation and depletion of utility plant were approximately 3.5 percent for 2000 and 3.0 percent for 1999.

□ REVENUE AND EXPENSE RECOGNITION

We record operating revenues monthly on the basis of consumption or service rendered. To match revenues with associated expenses, we accrue unbilled revenues for electric and natural gas services delivered to customers but not yet billed at month-end.

REGULATORY ASSETS AND LIABILITIES

For our regulated operations, we follow SFAS No. 71, "Accounting for the Effects of Certain Types of Regulation." Pursuant to this pronouncement, certain expenses and credits, normally reflected in income as incurred, are recognized when included in rates and recovered from or refunded to the customers. The significant regulatory assets and liabilities we have recorded are discussed below.

With the sale of the electric generating assets, it is our position that any of the following amounts related to electric supply should be recovered from sale proceeds in excess of book value. Amortization of these items stopped in February 2000 when the expenses were removed from rates. For further information on the effects of the sale of our electric generating assets, see Note 4, "Deregulation, Regulatory Matters, and 1999 Sale of Electric Generating Assets."

In the ratemaking process, tax costs and benefits related to certain temporary differences are recovered in rates on an as paid or "flow-through" basis. SFAS No. 109, "Accounting for Income Taxes," requires that tax assets and liabilities be reflected on the balance sheet on an accrual basis. This timing difference requires that we recognize a regulatory asset for taxes accrued but not yet recovered in rates. That regulatory asset was \$88,822,000 and \$87,222,000 as of December 31, 2000 and 1999, respectively.

In August 1985, the Montana Public Service Commission (PSC) issued an order allowing us to recover deferred carrying charges and depreciation expenses over the remaining life of Colstrip Unit 3. These recoveries compensated us for unrecovered costs of our investment for the period from January 10, 1984, to August 29, 1985, when we placed the plant in service. We were amortizing this asset to expense, and recovering in rates, \$1,831,000 per year. At December 31, 2000 and 1999, the unamortized amounts were \$38,337,000 and \$38,494,000, respectively.

We also include costs related to our Demand Side Management (DSM) programs in other regulatory assets. These amounts were \$27,956,000 and \$28,378,000 for 2000 and 1999, respectively. These costs are in rate base and we were amortizing them to income over a 10-year period.

We recorded a regulatory liability of \$32,549,000 in connection with the sale of our unregulated oil and natural gas operations on October 31, 2000. The liability represents the portion of the proceeds from the sale attributable to properties previously in the natural gas utility's rate base. Based on gas stipulation agreements addressing the removal of natural gas production properties from regulation, we have agreed to share this amount with our natural gas utility ratepayers. For more information on the sale of oil and natural gas operations see Note 2, "Decision to Sell Energy Businesses."

Certain other amounts represent items that we are amortizing currently or are subject to future regulatory confirmation.

Changes in regulation or changes in the competitive environment could result in our not meeting the criteria of SFAS No. 71. If we were to discontinue application of SFAS No. 71 for some or all of our regulated operations, we would have to eliminate the related regulatory assets and liabilities from the balance sheet. We would include the associated expenses and credits in

income in the period when the discontinuation occurred, unless recovery of those costs was provided through rates charged to those customers in portions of the business that were to remain regulated.

□ STORM DAMAGE AND ENVIRONMENTAL REMEDIATION COSTS

When losses from costs of storm damage and environmental remediation obligations for our utility operations are probable and reasonably estimable, we charge these costs against established, approved operating reserves.

□ INCOME TAXES

We defer income taxes to provide for the temporary differences between the financial reporting basis and the tax basis of our assets and liabilities. For further information on income taxes, see "Regulatory Assets and Liabilities" in this Note 1 and Note 5, "Income Tax Expense."

□ ASSET IMPAIRMENT

In accordance with SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of," we periodically review long-lived assets for impairment whenever events or changes in circumstances indicate that we may not recover the carrying amount of an asset.

□ COMPREHENSIVE INCOME

Comprehensive income consists of net income and other comprehensive income (loss). For the years ended December 31, 2000 and 1999, our only item of other comprehensive income was foreign currency translation adjustments of the assets and liabilities of our foreign subsidiaries. These adjustments resulted in increases to retained earnings of \$17,625,000 and \$3,058,000 in 2000 and 1999, respectively.

Nearly all of the 2000 increase resulted from the sale of the Canadian subsidiaries of our former oil and natural gas businesses. In accordance with SFAS Nos. 52, "Foreign Currency Translation," and 130, "Reporting Comprehensive Income," we recognized the cumulative translation loss associated with those subsidiaries by including it in the computation of the gain on the October 31, 2000 sale of the oil and natural gas businesses. Including it reduced our gain by approximately \$21,200,000. Because the translation adjustment was not part of the tax basis of the foreign subsidiaries' properties, it did not affect the calculation of taxes on the sale. For more information on the sale of oil and natural gas operations see Note 2, "Decision to Sell Energy Businesses."

□ DERIVATIVE FINANCIAL INSTRUMENTS

Electric Swap Agreements

Long-term power supply agreements, primarily one with a large industrial customer, expose us to commodity price risk, to the extent that a portion of the electric energy we are required to sell to our industrial customers at fixed rates is purchased at prices indexed to the Mid-Columbia (Mid-C) wholesale electric market, which can be higher than the fixed sales rate. We mitigate our exposure to losses on these agreements with financial derivative instruments called "price swaps" and offsetting electric energy purchase and

sales agreements.

Since June 1998, we have had a price swap agreement with one of our industrial customers that converts 43 MWs of the Mid-Columbia (Mid-C) index price of our supply agreement with that customer to a fixed price through May 2001. In fiscal year 2000, we also entered into another price swap with a counterparty that effectively hedges 35 MWs of the anticipated market-based purchases to supply that agreement through March 2001.

In accordance with the provisions of SFAS No. 80, "Accounting for Futures Contracts," we recognized gains and losses from the financial swaps in the same period in which the sales and related purchases under that agreement occurred. For fiscal year 2000, we recognized a net gain of approximately \$16,000,000 from these financial swaps and losses of approximately \$32,200,000 from supplying large industrial customers. For more specific information about the commodity price risk that we face as a result of our long-term power supply agreements, see Note 12, "Contingencies," in the "Long-Term Power Supply Agreements" section.

An estimate of the fair market value of the swaps based on the Mid-C forward prices of December 29, 2000 aggregated approximately \$21,800,000 as of December 31, 2000, which would offset approximately 40 percent of the expected losses on the above power supply agreements. For information on SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," and how we expect it to affect us, see Note 14, "New Accounting Pronouncements."

Natural Gas Utility Swaps

By drilling wells and adding compression at our Cobb storage reservoir, we are able to sell natural gas that had been held in reserve to provide firm storage deliverability to our customers. We therefore contracted to sell, from October 2000 through March 2001, 1,760,000 dekatherms from that reservoir at a monthly price based on the Alberta Energy Company "C" Hub (AECO-C) index. To reduce our exposure to fluctuations of the market index price, we entered into a swap agreement with a counterparty that effectively converts that index price to a fixed price for 903,000 dekatherms associated with these sales from December 2000 through February 2001.

For December 2000, we recognized a loss of approximately \$300,000 on the swap and a profit of approximately \$1,200,000 on the sale of the Cobb storage natural gas. Based on the AECO-C forward prices at December 29, 2000, we estimate a loss of approximately \$3,000,000 on the swap to offset profits of \$4,900,000 on the sale through February 2001. We are deferring the expected net profit of these transactions in accordance with SFAS No. 71, "Accounting for the Effects of Certain Types of Regulation," until the PSC approves its inclusion in future rate schedules.

□ FAIR VALUE OF FINANCIAL INSTRUMENTS

	2000		1999	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
		(Thousands	of Dollars)	
ASSETS: Other significant investments	\$ 21,127	\$ 21,127	\$ 19,509	\$ 19,509
LIABILITIES: Long-term debt (including due within one year)	\$ 384,155	\$ 381,654	\$ 646,468	\$ 628,313

The following methods and assumptions were used to estimate fair value:

- Other significant investments The carrying value of most of the investments approximates fair value as they have short maturities or the carrying value equals their cash surrender value. The investments consist mainly of the cash value of insurance policies associated with an unfunded, nonqualified benefit plan for senior management, executives, and directors.
- Long-term debt The fair value was estimated using quoted market rates for the same or similar instruments. Where quotes were not available, fair value was estimated by discounting expected future cash flows using year-end incremental borrowing rates.

NOTE 2 - DECISION TO SELL ENERGY BUSINESSES

On March 28, 2000, after a careful review of options and strategies, our Board of Directors announced that we would begin the process of divesting our multiple energy businesses, separating them from Touch America. Following the merger and the sale of the utility business to NorthWestern, Touch America expects to use the cash proceeds from the sale of the oil and natural gas businesses, the coal businesses, the independent power production business, and the utility business to take advantage of opportunities in the telecommunications business. We expect these gross cash proceeds, before income taxes and transaction costs, to total approximately \$1,300,000,000.

□ SALE OF OIL AND NATURAL GAS OPERATIONS

On August 25, 2000, our wholly owned subsidiary, Entech, and Altana Exploration Company, Entech's wholly owned subsidiary, entered into a Stock and Asset Purchase Agreement with PanCanadian Petroleum Limited (PanCanadian Petroleum) and one of PanCanadian Petroleum's wholly owned subsidiaries, PanCanadian Energy, Inc. (PanCanadian Energy). Pursuant to the Stock and Asset Purchase Agreement, PanCanadian Petroleum agreed to purchase from us all of the stock and assets of our Canadian oil and natural gas businesses, and PanCanadian Energy agreed to purchase from us all of the stock of our United States oil and natural gas businesses. (We collectively refer to PanCanadian Petroleum and PanCanadian Energy as PanCanadian.) The transaction closed on October 31, 2000, with a purchase price of US\$475,000,000, subject to post-closing adjustments.

As a result of the transaction, we recorded a gain in the fourth quarter 2000 of approximately \$62,000,000, net of income taxes and a regulatory liability of approximately \$32,500,000. The \$32,500,000 liability represents the portion of the proceeds from the sale of oil and natural gas businesses to PanCanadian attributable to properties previously in the natural gas utility's rate base. Based on gas stipulation agreements addressing the removal of natural gas production properties from regulation, we have agreed to share this amount with our natural gas utility ratepayers.

□ SALE OF CONTINENTAL ENERGY

On September 19, 2000, Entech entered into a Stock Purchase Agreement with BBI pursuant to which BBI agreed to purchase the stock of Continental Energy, our remaining independent power production business. In January 2001, BBI assigned its right to purchase Continental Energy to BBI's wholly owned subsidiary, CES Acquisition Corp. The transaction closed on February 21, 2001, with a purchase price of \$84,500,000, subject to post-closing adjustments. Based on the net book value of Continental Energy, we expect to record a gain in the first quarter 2001 of approximately \$33,000,000, net of income taxes. For information on the first quarter 2001 closing of the sale of Continental Energy, see Note 13 "Subsequent Events."

□ STATUS OF SALES OF REMAINING ENERGY BUSINESSES

Pending Sale of Coal Operations

On September 15, 2000, Entech entered into a Stock Purchase Agreement with Westmoreland pursuant to which Westmoreland agreed to purchase the companies comprising our coal businesses. The purchase price is \$138,000,000, subject to customary closing adjustments. We expect this transaction to close at approximately the beginning of the second quarter 2001 and, based on the net book value of our coal operations, we expect to record a gain on the sale. For information on the April 30, 2001 closure of the sale, see Note 13, "Subsequent Events."

The Montana Power L.L.C./Utility Business

On September 29, 2000, we entered into a Unit Purchase Agreement with NorthWestern Corporation, a South Dakota-based energy company, pursuant to which NorthWestern agreed, as discussed below, to purchase our affiliate. The Montana Power L.L.C., a Montana limited liability company (MPLLC). MPLLC will hold - among other assets, liabilities, commitments, and contingencies our electric (including Colstrip Unit 4) and natural gas utility business. The consideration for MPLLC is approximately \$1,090,000,000, and is comprised of cash of \$602,000,000 and NorthWestern's assumption of up to \$488,000,000 of our debt.

The transaction is targeted to close approximately three months after the proxy statement/prospectus is filed and becomes effective. The closing is subject to the approval of our shareholders, regulatory approvals from the PSC, and other customary conditions. We received approval for the sale from FERC in February 2001. We can provide no assurance that the transaction will close or, if it does, that the terms and conditions will remain unchanged. For additional information on the special meeting of our shareholders to consider and vote on the sale and other matters, see Note 3, "Upcoming Special Meeting of Shareholders."

NOTE 3 - UPCOMING SPECIAL MEETING OF SHAREHOLDERS

Our Board of Directors has approved a merger that will create a new company, Touch America Holdings, Inc., to own what is today our telecommunications business. Immediately following this merger, our remaining energy business consisting of our electric and natural gas utility - will be sold to NorthWestern. On completion of this merger and the sale of the utility business to NorthWestern, Touch America Holdings will own Touch America, Inc. and Tetragenics Company, which together will constitute its telecommunications operating business.

On completion of the merger, our shareholders will be deemed to receive one share of Touch America Holdings' common stock for each common share of The Montana Power Company, and one share of Touch America Holdings' Preferred Stock, \$6.875 Series, for each share of The Montana Power Company's outstanding Preferred Stock, \$6.875 Series.

We will hold a special meeting of our shareholders to consider and vote on the merger and the sale of the utility business to NorthWestern. In addition, shareholders of our common stock will be asked to vote in favor of the redemption of The Montana Power Company's outstanding Preferred Stock, \$4.20 Series, and Preferred Stock, \$6.00 Series. If the redemption of the preferred stock is not approved by at least a majority of all of our common shareholders, each shareholder of The Montana Power Company's Preferred Stock, \$4.20 Series, and Preferred Stock, \$6.00 Series, will be deemed to receive in the merger one share of Touch America Holdings' Preferred Stock, \$4.20 Series, and Preferred Stock, \$6.00 Series, for each outstanding share of The Montana Power Company's Preferred Stock, \$4.20 Series, and Preferred Stock, \$4.00 Series, respectively. We plan to schedule this special meeting of our shareholders for the second or third quarter 2001.

NOTE 4 - DEREGULATION, REGULATORY MATTERS, AND 1999 SALE OF ELECTRIC GENERATING ASSETS

DEREGULATION

The electric and natural gas utility businesses in Montana are transitioning to a competitive market in which commodity energy products and related services are sold directly to wholesale and retail customers. Montana's Electric Act, passed in 1997, provides that all customers will be able to choose their electric supplier by July 1, 2002. In October 2000, the PSC issued a Request for Comments on Extension of Transition Period. In December 2000, due to the lack of a competitive market for the supply of electric energy in Montana, the PSC extended the transition period two years, until July 1, 2004. Pursuant to the Electric Act, the electric utility is required to supply electric energy for the additional two-year period, and we are working with the Montana Legislature and the PSC to fully recover the default supply costs.

Montana's Natural Gas Act, also passed in 1997, provides that a utility may voluntarily offer its customers choice of natural gas suppliers and provide open access. We have opened access on our gas transmission and distribution

systems and all of our natural gas customers have the opportunity of gassupply choice.

Electric

Residential accounts previously in the competitive market largely returned to regulated supply in the fourth quarter 2000. Some industrial loads have curtailed operations due to high supply costs in the competitive market, reducing our electric load.

As required by the Electric Act, we filed a comprehensive transition plan with the PSC in July 1997. On July 1, 1999, we filed a case with the PSC to resolve the remaining Tier II issues under the filing. Tier II issues address the recovery and treatment of the Qualifying Facility (QF) powerpurchase contract costs; regulatory assets associated with the electric generating business; and a review of our electric generating assets sale, including the treatment of sale proceeds above the book value of the assets.

In implementing our comprehensive transition plan, we initiated litigation in Montana District Court in Butte to address our ability to use tracking mechanisms to ensure fair and accurate recovery of above-market QF costs and certain other transition costs. We also sought court clarification on whether the Electric Act authorized a rate freeze, which means that rates cannot change, or a rate cap, which means that rates cannot increase more than a certain level, during the initial transition period that ends July 1, 2002.

In May 2000, the district court ruled that the PSC must allow us to incorporate tracking mechanisms in our transition plan proposal and that the Electric Act authorized a rate cap. The PSC and the Large Customer Group appealed to the Montana Supreme Court the court's decision regarding tracking mechanisms, and we did not appeal its decision regarding the rate cap. The parties completed briefing of the tracking-mechanisms issue in October 2000 and are awaiting a decision from the Montana Supreme Court, which has requested amicus briefs and will schedule oral argument.

After the district court case, we updated our Tier II filing to reflect the closing of the sale of our electric generating assets. The PSC has suspended the procedural schedule pending a resolution from the Montana Supreme Court and, therefore, we do not expect an order from the PSC until the third or fourth quarter 2001.

Natural Gas

Through December 31, 2000, approximately 240 natural gas customers with annual consumption of 5,000 dekatherms or more - 52 percent of our pre-choice natural gas-supply load - have chosen alternate suppliers since the transition to a competitive natural gas environment began in 1991.

□ REGULATORY MATTERS

Milltown Dam and our electric transmission operations remain subject to FERC and PSC regulation, and the PSC regulates our electric distribution operations.

Our natural gas transportation pipelines are generally not subject to FERC jurisdiction. We conduct limited interstate transportation subject to FERC jurisdiction, but FERC has allowed the PSC to set the rates for this interstate service. Our natural gas storage and distribution services, as well as our intrastate transportation services, are subject to PSC jurisdiction.

As a public utility, we also are subject to PSC jurisdiction when we issue, assume, or guarantee securities, or when we create liens on our properties.

Electric

FERC

On March 30, 1998, we submitted a cost-of-service filing with FERC to increase our open access transmission rates and the rates for bundled wholesale electric service to two rural electric cooperatives. Effective November 1, 1998, FERC approved an interim increase in rates charged for transmission service. In May 2000, we received final approval from FERC.

Through a stranded-costs filing with FERC in April 2000, we are seeking recovery of approximately \$23,800,000 in transition costs associated with serving both of the wholesale electric cooperatives. We do not expect a FERC decision on this filing, which corresponds with our transition-costs recovery proceedings with the PSC in Montana, until after the PSC issues its order.

PSC

In January 2000, as a result of the sale proceeds from the sale of our electric generating assets exceeding the book value of the assets sold, we filed a voluntary rate reduction with the PSC for approximately \$16,700,000 annually. This reduction became effective February 2, 2000.

The Electric Act established a rate cap for all electric customers pursuant to which transmission and distribution rates could not be increased until July 1, 2000. On August 11, 2000, with the expiration of the Electric Act's cap, we filed a combined rate case with the PSC, seeking increased electric and natural gas rates. We requested increased annual electric transmission and distribution revenues of approximately \$38,500,000, with a proposed interim annual increase of approximately \$24,900,000. On November 28, 2000, the PSC granted us an interim electric rate increase of approximately \$14,500,000, with hearings on this submission held in late January and early February 2001. We expect a decision from the PSC during the second quarter 2001.

On August 25, 2000, we filed a request for increased rates to recover approximately \$9,200,000 of higher power-supply costs relating to certain QF costs on an interim basis, pending final determination of QF transition costs. In a PSC work session in October 2000, the PSC denied our request. We sought reconsideration of the PSC's order, but the PSC also denied this request in January 2001. We have decided not to appeal this decision.

In accordance with our October 31, 1998 Asset Purchase Agreement with PPL Montana, as amended June 29, 1999 and October 29, 1999, we expect to sell our portion of the 500-kilovolt transmission system associated with Colstrip

Units 1, 2, and 3 for \$97,100,000. We expect this transaction to close in 2001. The after-tax proceeds that we expect to receive as a result of this transaction will remain with The Montana Power L.L.C.

Natural Gas/PSC

On January 19, 2001, we submitted with the PSC an Annual Gas Cost Tracker for an increase of approximately \$51,000,000 and a Compliance Filing resulting from the sale of gathering and production properties previously in the natural gas utility's rate base for a credit of approximately \$32,500,000. This resulted in a net increase of approximately \$18,500,000 in revenues effective February 1, 2001. See Note 2, "Decision to Sell Energy Businesses," under the "Sale of Oil and Natural Gas Operations" section, for further information on the \$32,500,000 credit to our natural gas utility ratepayers.

As discussed above, we submitted a combined filing with the PSC on August 11, 2000, seeking increased natural gas and electric rates. We requested increased annual natural gas revenues of approximately \$12,000,000, with a proposed interim annual increase of approximately \$6,000,000. On November 28, 2000, the PSC granted us an interim natural gas rate increase of approximately \$5,300,000, with hearings on this submission held in late January and early February 2001. We expect a decision from the PSC during the second quarter 2001.

On August 12, 1999, we filed a natural gas rate case with the PSC requesting increased annual revenues of \$15,400,000, with a proposed interim increase of \$11,500,000. An interim increase of \$7,600,000 became effective on December 10, 1999, and a final PSC order that became effective on April 1, 2000 approved an additional increase of \$2,800,000.

□ 1999 SALE OF ELECTRIC GENERATING ASSETS

Assets Sold

On December 17, 1999, in accordance with the Asset Purchase Agreement entered into with PPL Montana, we sold substantially all of our electric generating assets and related contracts. We also sold an immaterial amount of associated transmission assets, totaling less than 40 miles. The asset sale did not include the Milltown Dam near Missoula, Montana (gross capacity of approximately 3 MWs) or any of our QF purchase-power contracts. It also did not include our leased share of the Colstrip Unit 4 generation or transmission assets.

As expected, the sale of our electric generating assets in December 1999 reduced the utility's net income for 2000. Utility revenues decreased because of discontinued off-system revenues that related to the electric generating assets sold. In addition, we no longer earn a return on our shareholders' investment in the electric generating assets. Before the sale, revenues covered the costs of operating the generating plants, taxes and interest, and earned a return on our shareholders' investment. Since the sale, we continue to bill our core customers for energy supply, but now these revenues recover the costs of the power that we purchase to serve these customers. The energy that we formerly generated and sold to core customers is now purchased pursuant to buyback contracts. The maximum price that we pay for power in the buyback contracts, \$22.25/MWh, represents our net fully allocated supply costs of service in current rates, replacing operations and

maintenance expense, property tax expense, depreciation expense, and return on investment associated with the electric generating assets.

In the sale of these assets, we generally retained all pre-closing obligations, and the purchaser generally assumed all post-closing obligations. However, with respect to environmental liabilities, the purchaser assumed all pre-closing (with certain limited exceptions) and postclosing environmental liabilities associated with the purchased assets.

While the purchaser assumed pre-closing environmental liabilities, we agreed to indemnify the purchaser from these pre-closing environmental liabilities, including a limited indemnity obligation for losses arising from required remediation of pre-closing environmental conditions, whether known or unknown at the closing, limited to:

- 50 percent of the loss. (Our share of this indemnity obligation at the Colstrip Project is limited to our pro-rata share of this 50 percent based on our pre-sale ownership share.)
- A two-year period after closing for unknown conditions. The indemnity for required remediation of pre-closing conditions known at the time of the closing continues indefinitely.
- An aggregate amount no greater than 10 percent of the purchase price paid for the assets.

In December 2000, we received a claim notice related to this indemnity obligation. Based on available information, we do not expect this indemnity claim on the indemnity obligation to have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Cash Proceeds

At December 31, 1999, we recorded a regulatory liability and related deferred income tax to reflect the generation sale proceeds in excess of book value. Our current estimate of this liability, which will ultimately be determined in the Tier II docket, is approximately \$215,000,000 before income taxes. This liability represents a deferral of the gain on the generation sale and nothing has been reflected in the Consolidated Statement of Income.

As part of our Tier II filing, we plan to deduct from the regulatory liabilities approximately \$22,000,000 of other generation-related transition costs and approximately \$65,600,000 of regulatory asset transition costs. The other generation-related transition costs consist mainly of SG&A costs and costs to retire debt. The regulatory asset transition costs consist mainly of capitalized conservation costs and carrying charges associated with Colstrip Unit 3.

We have used a portion of the net cash proceeds received (excluding the proceeds in excess of book value) to purchase shares of our common stock, to reduce debt, and to fund projects involving expansion of Touch America. For additional information on the purchase of shares of common stock and the reduction of debt, see Note 7, "Common Stock," and Note 10, "Long-Term Debt." For additional information on Touch America's projects, see Note 14, "Commitments," in the "Telecommunications" section.

Effect on 1999 Earnings

The asset sale affected positively our electric utility's 1999 earnings through the reversal of approximately \$3,000,000 (after taxes) in interest expense recorded in prior years relating to Kerr Project liabilities and through recognition of approximately \$10,000,000 in ITCs.

NOTE 6 - INCOME TAX EXPENSE

Income before income taxes was as follows:

	Year Ended December 31		
	2000	1999	
	(Thousands of Dollars)		
Income from continuing operations:			
United States	\$ (4,173)	\$ 76,861	
Canada	237	104	
	\$ (3,936)	\$ 76 , 965	

The provision for income taxes differs from the amount of income tax that would result by applying the applicable United States statutory federal income tax rate to pretax income because of the following differences:

	Year Ended December 31		
-	2000	1999	
-	(Thousands	of Dollars)	
Computed "expected" income tax expense	\$ (1,378)	\$ 26,938	
Adjustments for tax effects of:			
General business credits	(167)	(20,489)	
State income tax, net	(4,734)	1,219	
Reversal of excess of utility book/tax			
depreciation	4,119	5,318	
Other	(14,174)	(1,056)	
Actual income tax expense	\$ (16,334)	\$ 11,930	

Income tax expense as shown on the Consolidated Statement of Income consists of the following components:

	Year Ended	December 31
	2000	1999
	(Thousands	of Dollars)
Current:		
United States	\$ 6,706	\$157 , 950
Canada	16	63
State	(861)	31,905
	5,861	189,918
Deferred:		
United States	(20,448)	(149,979)
Canada	-	-
State	(1,747)	(28,009)
	(22,195)	(177,988)
Income tax expense attributable to continuing operations	\$(16,334)	\$ 11 , 930

Deferred tax (assets) liabilities are comprised of the following:

	December 31		
	2000	1999	
	(Thousands	of Dollars)	
Plant related	\$221,632	\$216,281	
Other	36,063	39,812	
Gross deferred tax liabilities	257,695	256,093	
Amortization of gain on sale/leaseback	(4,681)	(4,681)	
Investment tax credit amortization	(14,056)	(14,056)	
Other	(154,322)	(131,754)	
Gross deferred tax assets	resources a state of the state	(150,491)	
Net deferred tax liabilities	\$ 84,636	\$105,602	

The change in net deferred tax (assets) liabilities differs from current year deferred tax expense as a result of the following:

	 nousands Dollars
Increase(decrease)in total deferred tax liabilities	\$ (20,966)
(assets) Regulatory assets related to income taxes Balance sheet only-generation sale regulatory asset. Amortization of investment tax credits	2,618 (3,681) (166)
Other Deferred tax expense	\$ (22,195)

NOTE 7 - COMMON STOCK

On June 22, 1999, the Board of Directors approved a two-for-one split of our outstanding common stock. As a result of the split, which was effective August 6, 1999, for all shareholders of record on July 16, 1999, 55,099,015 outstanding shares of common stock were converted to 110,198,030 outstanding shares of common stock. We have retroactively applied the split to all earlier periods presented.

□ SHARE REPURCHASE PROGRAM

In 1998, the Board of Directors authorized a share repurchase program over the next five years to repurchase up to 20,000,000 shares, (approximately 18 percent of our then-outstanding common stock) on the open market or in privately negotiated transactions. As of December 31, 2000, we had 103,742,934 common shares outstanding. The number of shares to be purchased and the timing of the purchases will be based on the level of cash balances, general business conditions, and other factors, including alternative investment opportunities.

Subsequent to this authorization, we entered into a Forward Equity Acquisition Transaction (FEAT) program with a bank that committed to purchase shares on our behalf. Under the terms of the program, the amount owed to the bank and the number of shares held by the bank cannot exceed certain limits. In March 2000, these limits were amended and now are \$125,000,000 and 2,500,000 shares. The expiration date of the program is August 1, 2001. Until that date, when all transactions must be settled, we can elect to fully or partially settle either on a full physical (cash) or a net share basis. A full physical settlement would be the purchase of shares from the bank for cash at the bank's average purchase price plus interest costs less dividends. A net share settlement would be the exchange of shares between the parties so that the bank receives shares with value equivalent to its original purchase price plus interest costs less dividends.

In December 1999, when the limits described above were \$200,000,000 and 8,000,000 shares, we used proceeds from the sale of our generation assets to acquire 4,682,100 shares of our stock under the FEAT program. We purchased these shares at prices, including commissions, which ranged from \$27.05 per share to \$33.52 per share. The total cost was \$144,872,000 for an average price of approximately \$30.94 per share. In December 2000, we acquired an additional 1,933,900 shares of our stock under the program. The prices, including commissions, for these shares ranged from \$27.26 per share to \$33.53 per share and their total cost was \$60,784,000 for an average price of approximately \$31.43 per share. We have reflected the entire 6,616,000 shares purchased as "Reacquired Capital Stock" with a cost of \$205,656,000 on the Comparative Balance Sheet. As of March 16, 2001, the bank had acquired no further shares on our behalf.

□ SHAREHOLDER PROTECTION RIGHTS PLAN

We have a Shareholder Protection Rights Plan (SPRP) that provides one preferred share purchase right on each outstanding common share. Each purchase right entitles the registered holder, upon the occurrence of certain events, to purchase from us one one-hundredth of a share of Participating Preferred Shares, A Series, without par value. If it should become exercisable, each purchase right would have economic terms similar to one

share of common stock. The purchase rights trade with the underlying shares and will, except under certain circumstances described in the SPRP, expire on June 6, 2009, unless redeemed earlier or exchanged by us.

□ DIVIDEND REINVESTMENT AND STOCK PURCHASE PLAN

Our Dividend Reinvestment and Stock Purchase Plan permits participants to: (a) acquire additional shares of common stock through the reinvestment of dividends on all or any specified number of common and/or preferred shares registered in their own names, or through optional cash payments of up to \$60,000 per year; and (b) deposit common and preferred stock certificates into their Plan accounts for safekeeping. It also allows for other interested investors (residents of certain states) to make initial purchases of its common shares with a minimum of \$100 and a maximum of \$60,000 per year.

In conjunction with the pending divestiture of our energy businesses and our transition to a telecommunications enterprise, our Board of Directors voted in October 2000 to eliminate the dividend payment on our common stock effective the first quarter 2001. The final quarterly dividend on our common stock was \$0.20 per share, payable on November 1, 2000. The Board's decision did not affect dividends on our preferred stock.

□ RETIREMENT SAVINGS PLAN

We have a 401(k) Retirement Savings Plan that covers eligible employees. We contribute, on behalf of the employee, a matching percentage of the amount contributed to the Plan by the employee. In 1990, we borrowed \$40,000,000 at an interest rate of 9.2 percent to be repaid in equal annual installments over 15 years. The proceeds of the loan were lent on similar terms to the Plan Trustee, which used the proceeds to purchase 3,844,594 shares of our common stock. Shares acquired with loan proceeds are allocated monthly to Plan participants to help meet the Company's matching obligation. The loan, which is reflected as long-term debt, is offset by a similar amount in common shareholders' equity as unallocated stock. Our contributions plus the dividends on the shares held under the Plan are used to meet principal and interest payments on the loan with the Plan Trustee. As principal payments on the loan are made, long-term debt and the offset in common shareholders' equity are both reduced. At December 31, 2000, 2,756,662 shares had been allocated to the participants' accounts. We recognize expense for the Plan using the Shares Allocated Method, and the pretax expense was \$2,570,000 and \$3,768,000 for 2000 and 1999, respectively.

□ LONG-TERM INCENTIVE PLAN

Under the Long-Term Incentive Plan, we have issued options to our employees. Options issued to employees are not reflected in balance sheet accounts until exercised, at which time: (1) authorized, but unissued shares are issued to the employee; (2) the capital stock account is credited with the proceeds; and (3) no charges or credits to income are made.

Options were granted at the average of the high and low prices as reported on the New York Stock Exchange composite tape on the date granted and expire ten years from that date.

Option activity is summarized below:

	200	0	199	9
	Wtd Avg Exercise			Wtd Avg Exercise
	Shares	Price	Shares	Price
Outstanding,				
Beginning of year	3,280,325	\$25.63	2,548,094	\$22.71
Granted	1,199,545	34.36	919,510	32.14
Exercised	149,834	17.07	88,857	10.83
Cancelled	253,792	26.88	98,422	24.08
Outstanding, end of year	4,076,244	\$28.43	3,280,325	\$25.63

Shares under option at December 31, 2000, are summarized below:

	Options Outstanding			Options Exe	ercisable
Exercise Price Range	Shares	Wtd Avg Exercise Price	Wtd Avg Exercise Life	Shares	Wtd Avg Exercise Price
\$10.81 to \$11.31 \$18.00 to \$23.06 \$26.53 to \$32.50 \$35.36 to \$38.69	228,099 472,999 2,359,346 1,015,800	\$11.05 19.48 28.21 37.00	5 yrs 8 yrs 9 yrs 9 yrs	228,099 383,446 1,507,154 258	\$11.05 18.64 26.62 35.36
	4,076,244			2,118,957	

As permitted by SFAS No. 123, "Accounting for Stock-Based Compensation," we have elected to follow Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" (APB 25), and related interpretations in accounting for our employee stock options. Under APB 25, because the exercise price of the employee stock options equals the market price of the underlying stock on the date of grant, no compensation expense is recognized. Disclosure of pro forma information regarding net income and earnings per share is required by SFAS No. 123. This information has been determined as if we had accounted for our employee stock options under the fair value method of that statement. The weighted-average fair value of options granted in 2000 and 1999 was \$16.35 and \$7.03, respectively. We employed the binomial option-pricing model to estimate the fair value of each option grant on the date of grant. We used the following weighted-average assumptions for grants in 2000 and 1999, respectively: (1) risk-free interest rate of 6.05 percent and 6.35 percent; (2) expected life of 6.2 and 9.8; (3) expected volatility of 42.00 percent and 24.92 percent; and (4) a dividend yield of zero percent and 5.97 percent. Had we elected to use SFAS No. 123, compensation expense would have increased \$11,827,000 in 2000, \$5,280,000 in 1999, and \$795,000 in 1998. The 2000 pro forma net income would be \$188,632,000, and the 1999 pro forma net income would be \$143,456,000.

NOTE 8 - PREFERRED STOCK

We have 5,000,000 authorized shares of preferred stock. We cannot declare or pay dividends on our common stock while we have not either declared and set apart cumulative dividends or paid dividends on any of our preferred stock.

	Stated and Liquidation	Shares Issued and Outstanding		Thous of Dol	
Series	Price*	2000	1999	2000	1999
\$6.875	\$100	360,800	360,800	\$36,080	\$36,080
6.00	100	159,589	159,589	15,959	15,959
4.20	100	60,000	60,000	6,025	6,025
Discount		_	-	(410)	(410)
		580,389	580,389	\$57,654	\$57,654

Our preferred stock is in three series as detailed in the following table:

*Plus accumulated dividends.

We have the option of redeeming our preferred stock with the consent or affirmative vote of the holders of a majority of the common shares on 30 days notice at \$110 per share for our \$6.00 Series and \$103 per share for our \$4.20 Series, plus accumulated dividends. Our \$6.875 Series is redeemable in whole or in part, at any time on or after November 1, 2003, for a price beginning at \$103.438 per share, which decreases annually through October 2013. After that time, the redemption price is \$100 per share.

As discussed in Note 3, "Upcoming Special Meeting of Shareholders," we have asked our shareholders of common stock to vote in favor of the redemption of our outstanding Preferred Stock, \$4.20 Series, and \$6.00 Series. In addition, our Board of Directors will seek approval to redeem our Preferred Stock, \$6.875 Series. We are not requesting our shareholders to take any action on this matter at this time.

NOTE 9 - COMPANY OBLIGATED MANDATORILY REDEEMABLE PREFERRED SECURITIES OF SUBSIDIARY TRUST

We established Montana Power Capital I (Trust) as a wholly owned business trust to issue common and preferred securities and hold Junior Subordinated Deferrable Interest Debentures (Subordinated Debentures) that we issue. At December 31, 2000 and 1999, the Trust has issued 2,600,000 units of 8.45 percent Cumulative Quarterly Income Preferred Securities, Series A (QUIPS). Holders of the QUIPS are entitled to receive quarterly distributions at an annual rate of 8.45 percent of the liquidation preference value of \$25 per security. The sole asset of the Trust is \$67,000,000 of our Subordinated Debentures, 8.45 percent Series due 2036. The Trust will use interest payments received on the Subordinated Debentures that it holds to make the quarterly cash distributions on the QUIPS. The QUIPS' \$65,000,000 liquidation value is included with Other Long Term Debt on the balance sheet.

On or after November 6, 2001, we can wholly redeem the Subordinated Debentures at any time, or partially redeem the Subordinated Debentures from time to time. We also can wholly redeem the Subordinated Debentures if certain events occur before that time. Upon repayment of the Subordinated

Debentures at maturity or early redemption, the Trust Securities must be redeemed. In addition, we can terminate the Trust at any time and cause the pro rata distribution of the Subordinated Debentures to the holders of the Trust Securities.

Besides our obligations under the Subordinated Debentures, we have agreed to certain Back-up Undertakings. We have guaranteed, on a subordinated basis, payment of distributions on the Trust Securities, to the extent the Trust has funds available to pay such distributions. We also have agreed to pay all of the expenses of the Trust. Considered together with the Subordinated Debentures, the Back-up Undertakings constitute a full and unconditional guarantee of the Trust's obligations under the QUIPS. We are the owners of all the common securities of the Trust, which constitute 3 percent of the aggregate liquidation amount of all the Trust Securities.

We established Montana Power Capital I (Trust) as a wholly owned business trust to issue common and preferred securities and hold Junior Subordinated Deferrable Interest Debentures (Subordinated Debentures) that we issue. At December 31, 2000 and 1999, the Trust has issued 2,600,000 units of 8.45 percent Cumulative Quarterly Income Preferred Securities, Series A (QUIPS). Holders of the QUIPS are entitled to receive quarterly distributions at an annual rate of 8.45 percent of the liquidation preference value of \$25 per security. The sole asset of the Trust is \$67,000,000 of our Subordinated Debentures, 8.45 percent Series due 2036. The Trust will use interest payments received on the Subordinated Debentures that it holds to make the quarterly cash distributions on the QUIPS.

On or after November 6, 2001, we can wholly redeem the Subordinated Debentures at any time, or partially redeem the Subordinated Debentures from time to time. We also can wholly redeem the Subordinated Debentures if certain events occur before that time. Upon repayment of the Subordinated Debentures at maturity or early redemption, the Trust Securities must be redeemed. In addition, we can terminate the Trust at any time and cause the pro rata distribution of the Subordinated Debentures to the holders of the Trust Securities.

Besides our obligations under the Subordinated Debentures, we have agreed to certain Back-up Undertakings. We have guaranteed, on a subordinated basis, payment of distributions on the Trust Securities, to the extent the Trust has funds available to pay such distributions. We also have agreed to pay all of the expenses of the Trust. Considered together with the Subordinated Debentures, the Back-up Undertakings constitute a full and unconditional guarantee of the Trust's obligations under the QUIPS. We are the owner of all the common securities of the Trust, which constitute 3 percent of the aggregate liquidation amount of all the Trust Securities.

NOTE 10 - LONG-TERM DEBT

The Mortgage and Deed of Trust (Mortgage) imposes a first mortgage lien on all physical properties owned, exclusive of subsidiary company assets and certain property and assets specifically excepted. The obligations collateralized are First Mortgage Bonds, including those First Mortgage Bonds designated as Secured Medium-Term Notes (MTNs) and those securing Pollution Control Revenue Bonds.

Long-term debt consists of the following:

	December 31		
	2000	1999	
	(Thousands	of Dollars)	
First Mortgage Bonds:			
7 ½% series, due 2001	ş —	\$ 25,000

Total Long-term Debt	\$384,155	\$646,468	

On April 13, 2000, we retired, prior to maturity, \$25,000,000 of our 7.5 percent First Mortgage Bonds (Bonds) due April 1, 2001.

On April 25, 2000, we offered to purchase any or all of the following series of our outstanding debt: 8.95 percent Bonds due February 1, 2022; 7.33 percent Secured MTNs due April 15, 2025; 8.11 percent Secured MTNs due January 25, 2023; 7.00 percent Bonds due March 1, 2005; and 8.25 percent Bonds due February 1, 2007. The total amount outstanding for these issues was \$190,000,000 as of April 25, 2000. On May 24, 2000, we retired \$182,803,000 of this amount, as follows:

- \$44,614,000 of 7.00 percent Bonds due March 1, 2005;
- \$54,635,000 of 8.25 percent Bonds due February 1, 2007;
- \$48,554,000 of 8.95 percent Bonds due February 1, 2022;
- \$20,000,000 of 7.33 percent Secured Series A MTNs due April 15, 2025; and
- \$15,000,000 of 8.11 percent Secured Series A MTNs due January 25, 2023.

We retired two additional issues of Series A Secured MTNs during 2000. On January 13, 2000, we retired \$5,000,000 of 7.25 percent notes due January 19, 2024, and on June 1, 2000, we retired at maturity \$20,000,000 of 7.20 percent notes.

On January 14, 2000, we retired \$7,000,000 of 8.68 percent Series A Unsecured MTNs due February 7, 2022. We retired \$10,000,000 of 8.80 percent Series A Unsecured MTNs at maturity on February 22, 2000.

All of the above debt retirements, including transaction costs, were made from the proceeds received from the 1999 sale of our electric generating assets.

As discussed in Note 13, "Contingencies," we recorded long-term debt of approximately \$57,000,000 regarding the Kerr mitigation in June 1997. This amount represented the net present value of future costs to be paid over the life of the license. With the sale of the generating assets, payments after the sale date are no longer our responsibility. Therefore, we reduced debt on the sale date to approximately \$24,300,000. On December 30, 1999, we paid approximately \$14,100,000 of this amount. We included the remaining balance of \$10,200,000 at December 31, 1999, in "Other" in the table above. The final payment for \$10,200,000 occurred on January 3, 2000.

Scheduled debt repayments on the long-term debt outstanding at December 31, 2000, amount to: \$63,531,000 in 2001; \$3,856,000 in 2002; \$19,211,000 in 2003; \$4,599,000 in 2004; zero in 2005; and \$292,958,000 thereafter.

NOTE 11 - SHORT-TERM BORROWING

We have short-term borrowing facilities with commercial banks that provide both committed and uncommitted lines of credit and the ability to sell commercial paper. Bank borrowings either bear interest at the lender's floating base rate and may be repaid at any time, or have fixed rates of interest and maturities. Commercial paper has fixed rates of interest and maturities.

At December 31, 2000, we had lines of credit consisting of \$85,000,000 committed and \$40,000,000 uncommitted. In addition, Entech, Inc. (Entech, a wholly owned non-utility subsidiary of MPC) shares with us an uncommitted credit line of \$30,000,000, from which either company may borrow but the total of which they cannot exceed. Facility fees or commitment fees on the committed lines of credit are not significant. We also have the ability to issue up to \$85,000,000 of commercial paper based on the total of unused committed lines of credit and revolving credit agreements.

At December 31, 2000, we had outstanding notes payable to banks for \$75,000,000 at an average annual interest rate of 8.05 percent. Of these outstanding notes, \$25,000,000 was issued from our committed lines of credit and the other \$50,000,000 from our uncommitted lines of credit and the uncommitted line shared with Entech.

NOTE 12 - RETIREMENT PLANS

We maintain trusteed, noncontributory retirement plans covering substantially all of our employees. Prior to 1998, our retirement benefits were based on salary, years of service, and social security integration levels. In 1998, we amended our retirement plan's benefit provisions. Our retirement benefits are now based on salary, age, and years of service.

Our plan assets consist primarily of domestic and foreign corporate stocks, domestic corporate bonds, and United States Government securities.

We also have an unfunded, nonqualified benefit plan for senior management executives and directors. In December 1998, we froze the benefits earned and curtailed the plan.

As a result of the sale of our electric generating assets to PPL Montana, 454 participants related to electric generation operations were curtailed from the retirement plan and approximately \$22,700,000 in assets were transferred from the retirement plan trust in December 1999. Pursuant to the agreement, when the calculation was finalized in February 2000, approximately \$3,200,000 of additional assets was transferred to the PPL trust. In accordance with SFAS 88, we calculated a curtailment gain of approximately \$4,100,000 and a settlement gain of approximately \$7,800,000 in 1999. Due to regulatory accounting treatment, the gains were recorded as regulatory liabilities or offsets to regulatory assets, resulting in no income statement impact.

We offered a Special Retirement Program (SRP) to certain eligible employees during 2000. The SFAS 88 special termination charge resulting from 130 utility participants electing the SRP amounted to approximately \$6,443,000. Due to regulatory accounting treatment, the expense was recorded as regulatory liabilities or offsets to regulatory assets, resulting in no income statement impact.

We also provide certain health care and life insurance benefits for eligible retired employees. In 1994, we established a pre-funding plan for postretirement benefits for Utility employees retiring after January 1,1993. The plan assets consist primarily of domestic and foreign corporate stocks, domestic corporate bonds, and United States Government securities. The PSC allows us to include in rates all utility Other Postretirement Benefits costs on the accrual basis provided by SFAS No. 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions."

We also have a voluntary retirement savings plan in conjunction with our retirement plans. We contribute a matching percentage comprised of shares from a leveraged Employee Stock Ownership Plan arrangement and shares purchased on the open market. For costs associated with these plans, see Note 7, "Common Stock."

The following tables provide a reconciliation of the changes in the plans' benefit obligations and fair value of assets over the two-year period ending December 31, 2000, and a statement of the funded status as of December 31 of both years:

	Pension	Benefits	Other B	enefits
	2000	1999	2000	1999
		(Thousands	of Dollar:	s)
CHANGE IN BENEFIT OBLIGATION:	100 400	0000 666	<u> </u>	0 00 001

Net amount recognized				
at December 31	<u>(3,759)</u>	\$317	\$ <u>(1,773</u>)	\$ <u>(1,286)</u>

The following table provides the amounts recognized in the statement of financial position as of December 31:

	Pension	Benefits	Other Benefits
	2000	1999	2000 1999
		(Thousands	of Dollars)
Prepaid benefit cost Accrued benefit cost Net amount recognized			\$ <u>(1,773</u>) \$ <u>(1,286)</u>
at December 31	\$ <u>(3,759)</u>	\$317	\$ <u>(1,773</u>) \$ <u>(1,286)</u>

The following tables provide the components of net periodic benefit cost for the pension and other postretirement benefit plans, portions of which have been deferred or capitalized, for fiscal years 2000 and 1999:

	Pension	Benefits
	2000	1999
	(Thousands	of Dollars)
Service cost on benefits earned	\$ 2,964	\$ 5,038
Interest cost on projected benefit obligation	14,045	14,394
Expected return on plan assets	(17,825)	(19,598)
Amortization of:		
Transition obligation	(40)	(40)
Prior service cost	1,364	1,279
Actuarial (gain) loss	(2,472)	(1,208)
Net periodic benefit cost	(1,964)	(135)
Curtailment (gain) loss	-	(3,751)
Settlement (gain) loss	-	(7,844)
Net periodic benefit cost after curtailments and		
settlements	\$ 4,479	\$(11,730)

	Other	Benefits
	2000	1999
	(Thousands	of Dollars)
Service cost on benefits earned	\$ 324	\$ 548
Interest cost on projected benefit obligation	1,375	1,429
Expected return on plan assets	(712)	(645)
Amortization of:		
Transition obligation	756	955
Prior service cost	123	135
Actuarial (gain) loss	(110)	(100)
Net periodic benefit cost	1,756	2,322
Curtailment (gain) loss	-	(374)
Net periodic benefit cost after curtailments	\$ 1,756	\$ 1,948

In 2000, funding for pension costs exceeded SFAS No. 87, "Employers Accounting for Pensions," pension expense by \$3,078,000. In 1999, pension costs exceeded SFAS No. 87 pension expense by \$1,631,000. The PSC allows recovery for the funding of pension costs through rates. Any differences between funding and expense are deferred for recognition in future periods. At December 31, 2000, the regulatory liability was \$10,614,000.

The following assumptions were used in the determination of actuarial present values of the projected benefit obligations:

	Pension Benefits		Other Ben	efits
	2000	1999	2000	1999
		(Thousands	of Dollars)	
Weighted average assumptions as				
of December 31: Discount rate	7.50%	7.75%	7.50%	7.75%
Expected return on plan assets	9.00%	9.00%	9.00%	9.00%
Rate of compensation increase	4.40%	4.40%	4.40%	4.40%

Assumed health care costs trend rates have a significant effect on the amounts reported for the health care plans. A change of 1 percent in assumed health care cost trend rates would have the following effects:

			<u>1% Decrease</u> of Dollars)	
Effect on the total of service and interest cost components of net periodic post- retirement health care benefit cost	Ş	73	Ş	(61)
Effect on the health care component of the accumulated postretirement benefit obligation		512		(429)

The assumed 2001 health care cost trend rates used to measure the expected cost of benefits covered by the plans is 9.00 percent. The trend rate decreases through 2007 to 5.50 percent.

NOTE 13 - CONTINGENCIES

□ KERR PROJECT

A FERC order that preceded our sale of the Kerr Project required us to implement a plan to mitigate the effect of the Kerr Project operations on fish, wildlife, and habitat. To implement this plan, we were required to make payments of approximately \$135,000,000 between 1985 and 2020, the term during which we would have been the licensee. The net present value of the total payments, assuming a 9.5 percent annual discount rate, was approximately \$57,000,000, an amount we recognized as license costs in plant and long-term debt on the Consolidated Balance Sheet in 1997. In the sale of the Kerr Project, the purchaser of our electric generating assets assumed the obligation to make post-closing license compliance payments.

In December 1998 and January 1999, we asked the United States Court of Appeals for the District of Columbia Circuit to review this and another of FERC's orders and the United States Department of Interior's conditions contained in them. In December 2000, FERC issued an order approving a settlement among the parties. On February 15, 2001, the Circuit Court dismissed the petitions for review. Consequently, the approximately \$24,000,000 that we paid into escrow in 2000 will be released to the

Confederated Salish and Kootenai Tribes (Tribes) to be used in accordance with the terms of the settlement and, when we subsequently transfer to the Tribes 669 acres of land on the Flathead Indian Reservation, we will have fulfilled our obligations under the terms of this settlement. Because PPL Montana assumed the obligation in excess of \$24,000,000, the basis in the properties sold decreased and the regulatory liability associated with the deferred gain on the sale increased accordingly.

□ LONG-TERM POWER SUPPLY AGREEMENTS

Long-term power supply agreements, primarily an agreement with a non-core large industrial customer, have exposed us losses and potential future losses. That agreement obligates us to deliver to our customer one half of its electric energy at a fixed price and the remainder at an index-based price with a cap. When the agreement expires at the end of 2002, the customer has an option to extend the agreement through 2004. If the customer exercises this option, however, only index-based prices with no cap would apply during the extension period. Until the end of 2002, we must supply this and other industrial customers with electric energy purchased through an agreement indexed to the Mid-Columbia (Mid-C) market. As a result, we are exposed to the risk that electric energy we purchase at Mid-C prices can be higher than the fixed and capped sales rates.

In June 1998, we entered into a swap with the industrial customer whose agreement exposes us to most of our risk, so that the customer could effectively purchase all of its electric energy from us at a fixed rate. At the same time, we entered into a separate fixed-price purchase and related Mid-C index sale of equivalent volumes with other counterparties to hedge that swap and thus eliminate our exposure to fluctuating market prices. Both the purchase and sale agreements with the other counterparties remain effective through May 2001. During the third quarter 2000, however, our industrial customer whose contract exposes us to most of the commodity price risk increased its electric energy consumption, and wholesale electric prices increased substantially. The swap and related physical offset did not extend to the increase in our customer's consumption.

Specifically, the average monthly purchases of electric energy by this industrial customer increased more than 30 percent during the third quarter 2000 compared to the second quarter 2000. Average monthly wholesale electric prices in the Pacific Northwest, based on the Mid-C price index, more than doubled during the third quarter 2000 compared to the second quarter 2000. Because of these two events, the expenses of supplying our industrial customers with electric energy during the third quarter 2000 exceeded the associated revenues earned from these customers and the swap and physical offset by approximately \$8,400,000. By contrast, for the entire six months ended June 30, 2000, the expenses incurred to supply these customers exceeded the associated revenues earned from these customers and the swap and physical offset by approximately \$8,000,000.

To mitigate future losses, we entered into a five-month agreement in October 2000 with a counterparty - a fixed-for-variable financial swap whereby we fixed our purchase price on a portion of the electric energy needed to supply our industrial customers in exchange for a Mid-C index-based price. As long as our industrial customers do not materially change their estimated electric usage, this swap allows us to fix the total cost of supplying their electric

energy during the term of the swap and, therefore, in conjunction with our existing agreements, should limit our losses from supplying these customers.

Based on the effects of the existing purchase and sales agreements, the financial swaps, and customer usage, we incurred losses of approximately \$6,000,000 in the fourth quarter 2000 and, assuming customer usage stays relatively constant, we expect to experience losses of approximately \$4,000,000 in the first quarter 2001. If we continue to purchase electric energy at index-based market rates, or do not have other effective swaps in place, we estimate that the losses on agreements with these industrial customers - based on customer usage estimates and on forward price projections and broker quotations as of December 29, 2000 - could aggregate approximately \$25,000,000 in the second quarter 2001. Because of the volatility of the electric energy market in the western United States, particularly in the Pacific Northwest, and future possibilities of supplying these customers from alternative sources, we believe that estimating losses beyond the second quarter 2001 would not be reasonably indicative of actual results.

We continue to seek other opportunities to mitigate the commodity price risk associated with our power supply agreements, although we cannot assure that these efforts ultimately will be successful.

□ MISCELLANEOUS

We and our subsidiaries are parties to various other legal claims, actions, and complaints arising in the ordinary course of business. We do not expect the conclusion of any of these matters to have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

NOTE 14 - COMMITMENTS

D PURCHASE COMMITMENTS

Electric Utility

The Public Utilities Regulatory Policies Act (PURPA) requires a public utility to purchase power from QFs at a rate equal to what it would pay to generate or purchase power. These QFs are power production or co-generation facilities that meet size, fuel use, ownership, and operating and efficiency criteria specified by PURPA. The electric utility has 15 long-term QF contracts with expiration terms ranging from 2003 through 2032 that require us to make payments for energy capacity and energy received at prices established by the PSC. Three contracts account for 96 percent of the 101 MWs of capacity provided by these facilities. Montana's Electric Act designates the above-market portion of the QF costs as Competitive Transition Costs (CTCs) and allows for their recovery. For more information about CTCs, see Note 5, "Deregulation, Regulatory Matters, and 1999 Sale of Electric Generating Assets."

The Asset Purchase Agreement with PPL Montana, dated as of October 31, 1998 and amended June 29, 1999 and October 29, 1999, included two Wholesale Transition Service Agreements (WTSAs), effective December 17, 1999. These agreements enable us to fulfill our obligation to supply power until July

2002 to those customers who have not chosen another supplier. One agreement commits us to purchase 200 MWs per hour through December 2001, and the other agreement to purchase through June 2002 any power requirements remaining after having received power through the first WTSA, QFs, and Milltown Dam. Both agreements price the power sold at a market index, with a monthly floor and an annual cap. Under both agreements, the annual cap is \$22.25/MWh, which has been in effect for most of 2000 because wholesale electric energy prices in the Pacific Northwest have been higher than this amount. Assuming an 8.05 percent discount rate (our average short-term borrowing rate at December 31, 2000), current market indices, and current load forecasts, we estimate the net present value of the power purchased under the WTSAs at \$81,000,000 for 2001 and \$34,000,000 for 2002.

Our former affiliate, The Montana Power Trading & Marketing Company (MPT&M) which we sold on October 31, 2000 as part of the oil and natural gas businesses - had entered into several power purchase agreements in 1998. These agreements were assigned to the electric utility in 2000. One agreement obligates us to purchase 40 MWs per hour at a fixed rate until May 2001, and the other to purchase 100 MWs per hour of firm capacity and firm energy at 100 percent load factor at a market-indexed rate until August 2001.

Natural Gas Utility

The natural gas utility entered into take-or-pay contracts with Montana natural gas producers to provide adequate supplies of natural gas for our utility customers. We currently have six of these contracts, with expirations between 2002 and 2006. If we can supply customers with less expensive natural gas, we purchase the minimum required by the take-or-pay contracts. The cost of purchases through take-or-pay contracts is part of those costs submitted to the PSC for recovery in future rates. Since 1998, the natural gas utility enters only into one-year take-or-pay contracts, because of the uncertainty about the number and timing of customers who will choose another natural gas supplier under Montana's Natural Gas Act.

Contractual Payments and Present Value

Total payments under all of these contracts for the prior three years were as follows:

	Util	ity	Total		
	Electric	Natural	Gas		
	(Thou	isands of	Dollars)	1	
2000 1999	\$272,075 61,274	\$7, 4,	101 : 069	\$279,176 65,343	

Under the above agreements, the present value of future minimum payments, at a discount rate of 8.05 percent, is as follows:

	Util	ity	Total
	Electric	Natural G	as
_	(Thou	isands of D	ollars)
2001	\$224,435	\$ 5,00	3 \$229,438
2002	42,905	4,45	47,355
2003	8,380	64	1 9,021
2004	8,001	54	6 8,547
2005	7,537	46	5 8,002
Remainder	97,486	39	97,881
	\$388,744	\$ 11,50	\$400,244

□ LEASE COMMITMENTS

We have no material minimum operating lease payments. What capitalized leases we have are not material and are included in other long-term debt.

Rental expense for the prior two years was 6,800,000 for 2000 and 22,139,000 for 1999.

NOTE 15 - NEW ACCOUNTING PRONOUNCEMENTS

□ Staff Accounting Bulletin No. 101

SAB No. 101, "Revenue Recognition in Financial Statements" was issued by the SEC in December 1999 and is applicable to us beginning in the fourth quarter 2000.

As it relates to our companies, SAB No. 101 mainly affects Touch America. It requires that particular one-time charges received from customers be recognized as revenues over the period of time that the charges are earned rather than as revenues when assessed or paid. Our telecommunications operations realize payment of one-time fees for such items as installations and activations. Prior to SAB No. 101, we recognized these revenues when received. With the adoption of SAB No. 101 in the fourth quarter 2000, we now recognize these revenues over the period in which they are earned, which coincides with the number of years that those customers are anticipated to be customers of Touch America. The one-time charges all are received either from wholesale or commercial customers and, due to the number of transactions, the amounts cannot be segregated into the two customer classes. Under our policy, therefore, we amortize these deferred revenues over the average lives of wholesale and commercial customers. We have not deferred any costs for installations, activations, or subscriber acquisitions.

We have evaluated SAB No. 101, and the cumulative catch-up for its adoption had no material effect on our consolidated financial position, results of operations, or cash flows. The adoption of SAB No. 101 affected only our 2000 operations.

□ SFAS Nos. 133, 137, and 138

In June 2000, the FASB issued SFAS No. 138, "Accounting for Certain Derivative Instruments and Certain Hedging Activities," which amends some accounting and reporting standards of SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities." SFAS No. 133 was issued in June 1998. In July 1999, the FASB issued SFAS No. 137, "Accounting for Derivative Instruments and Hedging Activities: Deferral of the Effective Date of FASB Statement No. 133." SFAS No. 137 delayed for one year the effective date of SFAS No. 133, meaning that we are required to adopt SFAS No. 133 on January 1, 2001.

SFAS No. 133 expands the definition of a derivative and requires that all derivative instruments be recorded on an entity's balance sheet at fair value. As discussed in Note 2, "Decision to Sell Energy Businesses," we sold our oil and natural gas businesses - including MPT&M, which engaged in energy trading activities - on October 31, 2000.

We have reviewed our commodity purchase and sale agreements to evaluate exposure to potential embedded derivatives under SFAS No. 133 and SFAS No. 138. Effective January 1, 2001, we have accounted for the electric swap agreements described in Note 1, "Summary of Significant Accounting Policies," in the "Derivative Financial Instruments" section, as effective cash flow hedges pursuant to SFAS No. 133. Accordingly, these instruments have been marked to market, at January 1, 2001, with a corresponding credit entry made to Other Comprehensive Income for approximately \$18,800,000 before income taxes, representing our cumulative transition adjustment in adopting SFAS No. 133.

NOTE 16 - SUBSEQUENT EVENTS

In the first quarter 2001, we recorded a pretax gain of approximately \$50,800,000 for the sale of Continental Energy. On April 30, 2001, we closed the sale of our coal businesses to Westmoreland Coal Company for \$138,000,000, subject to customary closing and to post-closing adjustments. In connection with structuring its acquisition, in April 2001, Westmoreland assigned its right to purchase two of our coal business subsidiaries - Western Energy Company and Northwestern Resources Co. - to Westmoreland's wholly owned subsidiary, Westmoreland Mining LLC. Based on the net book value of our coal businesses, we expect to record a gain on this sale, net of income taxes, in the second quarter 2001. Because Continental Energy, Western Energy Company, and Northwestern Resources Co. had always been nonutility subsidiaries of MPC, these gains do not effect the income of MPC's utilities for the year 2001.
