NOTES AND DISCLAIMERS:

This document shows the tariff-verified rates for each utility as of the first day of the month. Mid-month changes are not reflected here. MDU's electric power supply costs consist of fuel used in its generating stations, energy purchases from MISO and a seasonal capacity contract. NWE's electric supply rate includes the cap-ex rate base value of its owned generation. NWE's electric supply rate includes Federal production tax credits for wind resources. NWE's gas cost includes the Battle Creek, Bear Paw, and Devon revenue requirements (update 11/2013). Gas supply rates for each company may include transportation and storage costs from other parties. The supply rates as shown on this document do not include any deferred supply rates.
