Montana Construction Budget	31	35
Peak and Energy	32	36
Sources and Disposition of Energy	33	36
Sources of Electric Supply	34	37
MT Conservation and Demand Side Mgmt. Programs	35	38
Montana Consumption and Revenues	36	39

## IDENTIFICATION

Legal Name of Respondent: The Washington Water Power Company

Name Under Which Respondent Does Business: The Washington Water Power Company

Date Utility Service First Offered in Montana: July, 1960

Person Responsible for Report: J.E. Eliassen, Vice President-Finance & CFO

Telephone Number for Inquiries: (509) 482-4335

Address for Correspondence Concerning Report: East 1411 Mission Avenue  
Spokane, WA 99202

If direct control over respondent is held by another entity, provide below the name, address, means by which control is held and percent ownership of controlling entity:

## BOARD OF DIRECTORS

	<u>Director Name &amp; Address (City, State)</u>	<u>Remuneration</u>
1	Paul A. Redmond (1) E. 1411 Mission Avenue, Spokane, WA 99202	498,742
2	David A. Clack E. 325 Sprague Avenue, Spokane, WA 99202	36,773
3	Duane B. Hagadone P.O.Box 6200, Coeur d' Alene, ID 83816	37,711
4	Robert S. Jepson 1 Skidway Village Walk, Suite 201, Savanna, GA 31411	50,798
5	Eugene B. Meyer 3 Plumbridge Lane, Hilton Head Island, SC 29928	51,584
6	General H. Norman Schwarzkopf 400 N. Ashley Street, Suite 3050, Tampa, FL 33602	38,045
7	B. Jean Silver N. 7102 Audubon Drive, Spokane, WA 99208	40,288
8	Larry A. Stanley W. 311 32nd Avenue, Spokane, WA 99203	40,606
9	R. John Taylor P.O. Box 538, Lewiston ID 83501	44,617
10	Eugene Thompson 3307 Pinecrest Road, Moscow, ID 83843	39,590

---

**NOTES TO FINANCIAL STATEMENTS**

---

**NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES***System of Accounts*

The accounting records of The Washington Water Power Company (Company) utility operations are maintained in accordance with the uniform system of accounts prescribed by the Federal Energy Regulatory Commission (FERC) and adopted by the appropriate state regulatory commissions.

*Basis of Reporting*

The financial statements are presented on a consolidated basis and, as such, include the assets, liabilities, revenues and expenses of the Company and its wholly owned subsidiaries, Pentzer Corporation (Pentzer), Washington Irrigation and Development Company (WIDCo), The Limestone Company and WP Finance Company. All material intercompany transactions that are not allowed recovery under regulation have been eliminated in the consolidation. As discussed in Note 14, the 1993 and 1994 operating results for ITRON are no longer consolidated and were accounted for on the equity method, and as of December 31, 1994 are now accounted for on the cost method.

The accompanying financial statements include the Company's proportionate share of utility plant and related operations resulting from its interests in jointly owned plants (See Note 12).

The financial activity of each of the Company's segments is reported in the "Schedule of Information by Business Segments." Such information is an integral part of these financial statements.

*Reclassifications*

Certain prior year amounts related to segment information have been reclassified due to a current year change in the allocation method for common plant, plant-related costs and administrative and general expenses.

*Utility Plant*

The cost of additions to utility plant, including internally developed information systems, an allowance for funds used during construction and replacements of units of property and betterments, is capitalized. Maintenance and repairs of property and replacements determined to be less than units of property are charged to operating expenses. Costs of depreciable units of property retired plus costs of removal less salvage are charged to accumulated depreciation.

*Allowance for Funds Used During Construction*

The Allowance for Funds Used During Construction (AFUDC) represents the cost of both the debt (Interest Capitalized) and equity funds used to finance utility plant additions during the construction period. In accordance with the uniform system of accounts prescribed by regulatory authorities, AFUDC is capitalized as a part of the cost of utility plant and is credited currently as a noncash item to Other Income and Interest Capitalized (see Other Income below). The Company generally is permitted, under established regulatory rate practices, to recover the capitalized AFUDC and a fair return thereon through its inclusion in rate base and the provision for depreciation after the related utility plant has been placed in service. Cash inflow related to AFUDC does not occur until the related utility plant is placed in service.

The effective AFUDC rate was 10.67% in 1994, 1993 and 1992. The Company's AFUDC rates do not exceed the maximum allowable rates as determined in accordance with the requirements of regulatory authorities.

*Allowance for Funds Used to Conserve Energy*

The Allowance for Funds Used to Conserve Energy (AFUCE) rate recovers carrying costs associated with Demand Side Management (DSM) program expenditures until such investment is included in rate base or amortized into rates. AFUCE is capitalized as a part of the cost of the DSM investment and is credited currently as a noncash item to Other Income and Interest Capitalized. The AFUCE rate in effect is the last authorized, or otherwise stipulated, rate of return from the Company's proceeding for natural gas or electric operations. The rate for Washington is adjusted for the tax effect of interest. Cash inflow related to AFUCE does not occur until the related DSM investment is placed in service.

***Deferred Charges and Credits***

The Company prepares its financial statements in accordance with the provisions of FAS No. 71, "Accounting for the Effects of Certain Types of Regulation." FAS No. 71 requires a cost-based, rate-regulated company to reflect the impact of regulatory decisions in its financial statements. In certain circumstances, certain costs and obligations, such as incurred costs not currently recovered through rates but expected to be recovered in the future, must be reflected in a deferred account in the balance sheet and not be reflected in income until matching revenues are recognized.

The primary regulatory assets include Investment in Exchange Power, Demand Side Management costs, the FAS 109 income tax deferral, the provision for FAS 106, and unrecovered purchased gas costs. Included in Deferred Charges, Other are debt issuance and redemption costs, which are amortized over the terms of the respective debt issues. Deferred credits include the gain on the general office building sale/leaseback being amortized over the life of the lease.

***Depreciation***

For utility operations, depreciation provisions are computed by a method of depreciation accounting utilizing unit rates for hydroelectric plants and composite rates for other properties. Such rates are designed to provide for retirements of properties at the expiration of their service lives. The rates for hydroelectric plants include annuity and interest components, in which the interest component is 6%. For utility operations, the ratio of depreciation provisions to average depreciable property was 2.56% in 1994, 2.68% in 1993 and 2.37% in 1992.

***Power and Natural Gas Cost Adjustment Provisions***

In 1989, the Idaho Public Utilities Commission (IPUC) approved the Company's filing for a power cost adjustment mechanism (PCA). The PCA is designed to allow the Company to change electric rates to recover or rebate a portion of the difference between actual and allowed net power supply costs. In 1994 and 1992, the Company deferred \$4.1 million and \$3.3 million, respectively, of net power supply costs, which resulted in like decreases in electric operating expenses. In 1993, the Company deferred \$4.6 million of net power supply cost savings, which resulted in like increases in electric operating expenses. Rate changes are triggered when the deferred balance reaches \$2.2 million. On January 1, 1995, a \$2.2 million surcharge was implemented for the next twelve months to recover costs resulting from low streamflow conditions during 1994. A rate increase was also implemented in November 1992 to pass through accumulated costs. As of December 31, 1994, \$1.4 million of costs not yet subject to a rate increase had accumulated in the PCA deferral account. On July 18, 1994, the IPUC approved an indefinite extension of the PCA.

Under established regulatory practices, the Company is also allowed to adjust its natural gas rates from time to time to reflect increases or decreases in the cost of natural gas purchased. Differences between actual natural gas costs and the natural gas costs allowed in rates are deferred and charged or credited to expense when regulators approve inclusion of the cost changes in rates.

***Operating Revenues***

The Company accrues estimated unbilled revenues for services provided through month-end.

***Income Taxes***

The Company and its eligible subsidiaries file consolidated federal income tax returns. Subsidiaries are charged or credited with the tax effects of their operations on a stand alone basis. The Company's federal income tax returns have been examined with all issues resolved, and all payments made, through the 1990 return.

***Earnings Per Share***

Earnings per share have been computed based on the weighted average number of common shares outstanding during the period. On November 9, 1993, the Company distributed, to shareholders of record on October 25, 1993, shares of its common stock, without par value, under a two-for-one stock split effected in the form of a 100% stock dividend. All references to number of shares and per share information have been adjusted to reflect the common stock split on a retroactive basis.

***Cash***

For the purposes of the Consolidated Statements of Cash Flows, the Company considers all temporary investments with an initial maturity of three months or less to be cash equivalents.

**Derivative Financial Instruments**

The Company's one involvement with derivative financial instruments is an interest rate cap agreement effective January 1995, for a three-year period, that sets a ceiling on the interest rate associated with a lease. Payments made under this agreement are being amortized to rent expense.

**New Accounting Standards**

Effective January 1, 1994, the Company adopted FAS No. 115, entitled "Accounting for Certain Investments in Debt and Equity Securities." Under FAS No. 115, investments in debt and marketable equity securities are classified as "available for sale" and are recorded at fair value. Investments totalling \$34.1 million and \$27.9 million are included on the Consolidated Balance Sheets as other property and investments and current assets, respectively. Unrealized investment gains, net of taxes, added \$14.3 million to the Consolidated Statements of Capitalization as of December 31, 1994 as a separate component of shareholders' equity.

**NOTE 2. RETIREMENT PLANS AND OTHER POSTRETIREMENT BENEFITS**

Effective January 1, 1993, the Company adopted FAS No. 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions." FAS No. 106 requires the Company to accrue the estimated cost of postretirement benefit payments during the years the employee provides services. The Company previously expensed the cost of these benefits, which are principally health care, as claims were incurred. FAS No. 106 allows recognition of the unrecognized transition obligation in the year of adoption or the amortization of such obligation over a period of up to twenty years. The Company elected to amortize this obligation of approximately \$34,500,000 over a period of twenty years.

The Company has received accounting orders from the Washington Utilities and Transportation Commission (WUTC) and the IPUC allowing the current deferral of expense accruals under this Statement as a regulatory asset for future recovery. At such time that rate recovery is requested and allowed, cumulative deferrals will be amortized over the remainder of the twenty-year amortization period. The Company expects to be able to recover the amortized amounts. Therefore, the Company's cash flows and income from operations are not affected by implementation of this Statement.

The Company provides certain health care and life insurance benefits for substantially all of its retired employees. In 1994, 1993 and 1992, the Company recognized \$1,270,000, \$1,250,000 and \$1,290,000, respectively, as an expense for postretirement health care and life insurance benefits. The following table sets forth the health care plan's funded status at December 31, 1994 and 1993.

Accumulated postretirement benefit obligation (thousands of dollars):

	<u>1994</u>	<u>1993</u>
Retirees	506	509
Fully eligible plan participants	1,340	1,341
Other active plan participants	<u>110</u>	<u>111</u>
Total participants	1,956	1,961
Fair value of plan assets	\$32	\$636
Accumulated postretirement benefit obligations in excess of plan assets	\$34,468	\$38,964
Unrecognized transition obligation	\$33,548	\$38,413
Accrued postretirement benefit cost	\$2,966	\$3,981

Net postretirement benefit cost for 1994 and 1993 consisted of the following components (thousands of dollars):

	<u>1994</u>	<u>1993</u>
Service cost - benefits earned during the period	\$475	\$776
Return on the plan assets (if any)	-	-
Interest cost on accumulated postretirement benefit obligation	\$1,539	\$2,018
Amortization of transition obligation	\$952	\$1,187

**THE WASHINGTON WATER POWER COMPANY**

The currently assumed health care cost trend rate used in measuring the accumulated postretirement benefit obligation is 12% for 1994, decreasing linearly each successive year until it reaches 7% in 1998. A one-percentage-point increase in the assumed health care cost trend rate for each year would increase the accumulated postretirement benefit obligation as of December 31, 1994 and net postretirement health care cost by approximately \$1,552,000. The assumed discount rate used in determining the accumulated postretirement benefit obligation was 8.5%.

The Company has a pension plan covering substantially all of its regular full-time employees. Some of the Company's subsidiaries also participate in this plan. Individual benefits under this plan are based upon years of service and the employee's average compensation as specified in the Plan. The Company's funding policy is to contribute annually an amount equal to the net periodic pension cost, provided that such contributions are not less than the minimum amounts required to be funded under the Employee Retirement Income Security Act, nor more than the maximum amounts which are currently deductible for tax purposes. Pension fund assets are invested primarily in marketable debt and equity securities. The Company also has another plan which covers the executive officers.

Net pension credit for 1994, 1993 and 1992 is summarized as follows:

	<u>1994</u>	<u>1993</u>	<u>1992</u>
	(Thousands of Dollars)		
Service cost-benefits earned during the period.....	\$ 4,323	\$ 3,150	\$ 2,846
Interest cost on projected benefit obligation.....	8,523	7,771	7,390
Actual return on plan assets.....	(248)	(15,108)	(12,257)
Net amortization and deferral.....	<u>(11,553)</u>	<u>3,717</u>	<u>886</u>
Net periodic pension cost (income).....	1,045	(470)	(1,135)
Less amounts charged (credited) to construction and other accounts.....	<u>-</u>	<u>-</u>	<u>(24)</u>
Net pension cost credited to operating expenses.....	<u>\$ 1,045</u>	<u>\$ (470)</u>	<u>\$ (1,111)</u>

The funded status of the Plan and the pension liability at December 31, 1994, 1993 and 1992, are as follows:

	<u>1994</u>	<u>1993</u>	<u>1992</u>
	(Thousands of dollars)		
Actuarial present value of benefit obligations:			
Accumulated benefit obligations (including vested benefits of \$(88,596,000), \$(84,531,000) and \$(76,226,000), respectively).....	\$ <u>(90,341)</u>	\$ <u>(85,368)</u>	\$ <u>(76,853)</u>
Projected benefit obligation for service rendered to date .....	\$(107,540)	\$(104,025)	\$(95,446)
Plan assets at fair value .....	<u>119,706</u>	<u>126,879</u>	<u>118,883</u>
Plan assets in excess of projected benefit obligation.....	12,166	22,854	23,437
Unrecognized net gain from returns different than assumed.....	(17,939)	(21,503)	(19,733)
Prior service cost not yet recognized in pension cost .....	14,803	7,983	8,568
Unrecognized net asset at year-end (being amortized over 11 to 19 years).....	(11,359)	(12,445)	(13,531)
Regulatory deferrals (1).....	<u>(1,841)</u>	<u>(3,256)</u>	<u>(1,381)</u>
Pension liability .....	<u>\$ (4,170)</u>	<u>\$ (6,367)</u>	<u>\$ (2,640)</u>

Assumptions used in calculations were:

Discount rate at year-end.....	8.5%	7.5%	8.5%
Rate of increase in future compensation level.....	4.0%	4.0%	5.0%
Expected long-term rate of return on assets.....	9.0%	9.0%	9.0%

(1) The Company has received accounting orders from regulatory authorities requiring the Company to defer the difference between pension cost as determined under FAS 87 and that determined for ratemaking purposes.

**THE WASHINGTON WATER POWER COMPANY**

**NOTE 3. ACCOUNTING FOR INCOME TAXES**

The Company adopted Statement of Financial Accounting Standards (FAS) No. 109, "Accounting for Income Taxes," effective January 1, 1993, which supersedes Accounting Principles Board Opinion 11 previously adopted by the Company. FAS No. 109 establishes revised financial accounting and reporting standards for the effects of income taxes.

As of December 31, 1994 and 1993, respectively, the Company had recorded net regulatory assets of \$174,349,000 and \$177,786,000 related to the probable recovery of FAS No. 109 deferred tax liabilities from customers through future rates. Such net regulatory assets will be adjusted by amounts recovered through rates.

Deferred income taxes reflect the net tax effects of (a) temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes, and (b) tax credit carryforwards. The net deferred federal income tax liability consists of the following (thousands of dollars):

	<u>1994</u>	<u>1993</u>
Deferred tax liabilities:		
Differences between book and tax bases of utility plant	\$317,991	\$297,175
Loss on reacquired debt	8,216	9,243
Deferred natural gas credits	1,095	2,679
Other	<u>8,957</u>	<u>5,575</u>
Total deferred tax liabilities	<u>336,259</u>	<u>314,672</u>
Deferred tax assets:		
Reserves not currently deductible	14,429	14,486
Contributions in aid of construction	3,710	2,975
Gain on sale of office building	1,555	1,647
Other	<u>6,398</u>	<u>6,659</u>
Total deferred tax assets	<u>26,092</u>	<u>25,767</u>
Net deferred tax liability	<u>\$310,167</u>	<u>\$288,905</u>

Refer to page 261 of the Federal Energy Regulatory Commission Form 1 for a reconciliation of federal income taxes.

**NOTE 4. LONG-TERM DEBT**

The annual sinking fund requirements and maturities for the next five years for First Mortgage Bonds and Medium-Term Notes outstanding at December 31, 1994 are as follows:

<u>Year Ended</u> <u>December 31</u>	<u>Maturities</u>	<u>Sinking Fund</u> <u>Requirements</u>	<u>Total</u>
		(Thousands of Dollars)	
1995.....	\$45,000	\$3,967	\$48,967
1996.....	35,000	3,767	38,767
1997.....	31,000	3,657	34,657
1998.....	10,000	3,657	13,657
1999.....	47,500	3,447	50,947

The sinking fund requirements may be met by certification of property additions at the rate of 167% of requirements. All of the utility plant is subject to the lien of the Mortgage and Deed of Trust securing outstanding First Mortgage Bonds.

**THE WASHINGTON WATER POWER COMPANY**

In 1993 and 1992, \$25,000,000 and \$113,000,000, respectively, of unsecured Medium-Term Notes, Series A and B were issued. At December 31, 1994, the Company had outstanding \$242,500,000 of such notes with maturities between 1 and 29 years and with interest rates varying between 5.50% and 9.58%.

In 1994 and 1993, \$88,000,000 and \$225,000,000, respectively, of Secured Medium-Term Notes, Series A and B were issued. At December 31, 1994, the Company had outstanding \$313,000,000 of such notes with maturities between 2 and 29 years and with interest rates varying between 4.72% and 8.25%. As of December 31, 1994, the Company had remaining authorization to issue up to \$187,000,000 of such notes of the \$250,000,000 originally authorized.

At December 31, 1994, the Company had \$58,000,000 outstanding under borrowing arrangements which will be refinanced in 1995. See Note 5 for details of credit agreements.

In accordance with FAS No. 107 "Disclosures About Fair Value of Financial Instruments," the fair value of the Company's long-term debt at December 31, 1994 and 1993 is estimated to be \$673.0 million, or 93% of the carrying value and \$690.0 million, or 107% of the carrying value, respectively. These estimates are based on available market information and appropriate valuation methodologies.

**NOTE 5. BANK BORROWINGS AND COMMERCIAL PAPER**

At December 31, 1994, the Company maintained total lines of credit with various banks under two separate credit agreements amounting to \$160,000,000. The Company has a revolving line of credit expiring December 9, 1997, which provides a total credit commitment of \$70,000,000. The second revolving credit agreement is composed of two tranches totaling \$90,000,000. The one-year tranche is renewable each year through 1995 and provides for up to \$50,000,000 of notes to be outstanding at any one time. The three-year tranche expires September 30, 1995, and provides for up to \$40,000,000 of notes to be outstanding at any one time. The Company pays commitment fees of up to 0.1875% per annum on the average daily unused portion of each credit agreement.

In addition, under various agreements with banks, the Company can have up to \$60,000,000 in loans outstanding at any one time, with the loans available at the banks' discretion. These arrangements provide, if funds are made available, for fixed-term loans for up to 180 days at a fixed rate of interest. In December 1994, the Company terminated its commercial paper program.

Balances and interest rates of bank borrowings under these arrangements were as follows:

	<u>Years Ended December 31,</u>	
	<u>1994</u>	<u>1993</u>
	(Dollars in thousands)	
<b>Balance outstanding at end of period:</b>		
Fixed-term loans .....	\$ 33,000	\$ 44,001
Commercial paper .....	-	20,000
Revolving credit agreement .....	25,000	4,000
<b>Maximum balance during period:</b>		
Fixed-term loans .....	\$ 52,000	\$ 69,000
Commercial paper .....	20,000	20,000
Revolving credit agreement .....	32,000	28,000
<b>Average daily balance during period:</b>		
Fixed-term loans .....	\$ 29,373	\$ 24,499
Commercial paper .....	-	7,791
Revolving credit agreement .....	10,941	5,030

**THE WASHINGTON WATER POWER COMPANY**

---

<b>Average annual interest rate during period:</b>		
Fixed-term loans .....	4.64%	3.38%
Commercial paper .....	-	3.46
Revolving credit agreement .....	4.49	3.49
<b>Average annual interest rate at end of period:</b>		
Fixed-term loans .....	6.28%	3.55%
Commercial paper .....	-	3.58
Revolving credit agreement .....	6.28	3.65

**NOTE 6. ACCOUNTS RECEIVABLE SALE**

The Company has entered into an agreement whereby it can sell, on a revolving basis, up to \$40,000,000 of interests in certain accounts receivable, both billed and unbilled. The Company is obligated to pay fees which approximate the purchaser's cost of issuing commercial paper equal in value to the interests in receivables sold. The amount of such fees is included in operating expenses. At both December 31, 1994 and 1993, \$40,000,000 in receivables had been sold pursuant to the agreement.

**NOTE 7. PREFERRED STOCK**

**Cumulative Preferred Stock Not Subject to Mandatory Redemption:**

The dividend rate on Flexible Auction Preferred Stock, Series J is reset every 49 days based on an auction. During 1994, the dividend rate varied from 3.000% to 4.950% and at December 31, 1994, was 4.950%. Series J is subject to redemption at the Company's option at a redemption price of 100% per share plus accrued dividends.

**Cumulative Preferred Stock Subject to Mandatory Redemption:**

**Redemption requirements:**

\$8.625, Series I - On June 15, 1996, 1997, 1998, 1999 and 2000, the Company must redeem 100,000 shares at \$100 per share plus accumulated dividends. The Company may, at its option, redeem up to 100,000 shares in addition to the required redemption on any redemption date.

\$6.95, Series K - On September 15, 2002, 2003, 2004, 2005 and 2006, the Company must redeem 17,500 shares at \$100 per share plus accumulated dividends through a mandatory sinking fund. Remaining shares must be redeemed on September 15, 2007. The Company has the right to redeem an additional 17,500 shares on each September 15 redemption date.

There are \$40 million in mandatory redemption requirements during the 1995-1999 period.

In accordance with FAS No. 107 "Disclosures About Fair Value of Financial Instruments," the fair value of the Company's preferred stock at December 31, 1994 and 1993 is estimated to be \$135.1 million, or 100% of the carrying value and \$93.8 million, or 110% of the carrying value, respectively. These estimates are based on available market information and appropriate valuation methodologies.

**NOTE 8. COMMON STOCK**

On November 9, 1993, the Company distributed, to shareholders of record on October 25, 1993, shares of its common stock, without par value, under a two-for-one stock split effected in the form of a 100% stock dividend. All references to number of shares and per share information have been adjusted to reflect the common stock split on a retroactive basis.

**THE WASHINGTON WATER POWER COMPANY**

In April 1990, the Company sold 1,000,000 shares of its common stock to the Trustee of the Investment and Employee Stock Ownership Plan for Employees of the Company (Plan) for the benefit of the participants and beneficiaries of the Plan. In payment for the shares of Common Stock, the Trustee issued a promissory note payable to the Company in the amount of \$14,125,000. Dividends paid on the stock held by the Trustee, plus Company contributions to the Plan, if any, are used by the Trustee to make interest and principal payments on the promissory note. The balance of the promissory note receivable from the Trustee (\$12,266,750 at December 31, 1994) is reflected as a reduction to common equity. The shares of Common Stock are allocated to the accounts of participants in the Plan as the note is repaid. During 1994, the cost recorded for the Plan was \$2,724,000. This included the cost for an additional 272,278 shares which were issued for ongoing employee and Company contributions to the Plan. Interest on the note payable, cash and stock contributions to the Plan and dividends on the shares held by the Trustee were \$1,195,000, \$2,264,000 and \$1,224,000, respectively.

In February 1990, the Company adopted a shareholder rights plan, which was subsequently amended, pursuant to which holders of Common Stock outstanding on March 2, 1990, or issued thereafter, have been granted one preferred share purchase right ("Right") on each outstanding share of Common Stock. Each Right, initially evidenced by and traded with the shares of Common Stock, entitles the registered holder to purchase one two-hundredth of a share of Preferred Stock of the Company, without par value, at an exercise price of \$40, subject to certain adjustments, regulatory approval and other specified conditions. The Rights will be exercisable only if a person or group acquires 10% or more of the Common Stock or announces a tender offer, the consummation of which would result in the beneficial ownership by a person or group of 10% or more of the Common Stock. The Rights may be redeemed, at a redemption price of \$0.005 per Right, by the Board of Directors of the Company at any time until any person or group has acquired 10% or more of the Common Stock. The Rights will expire on the earlier of February 16, 2000 and the effective time of the merger with SPR, SPPC and Resources West.

In November 1991, the Company received authorization to issue from time to time 1,500,000 shares of Common Stock under a Periodic Offering Program (POP). During 1992, the remaining 1,107,600 shares of the first POP were issued under this program for net proceeds of \$18.0 million. In the second half of 1992, the Company received authorization to issue a second 1,500,000 shares of common stock under the POP. Through December 31, 1994, 927,600 shares of the second POP were issued for net proceeds of \$17.3 million.

The Company has a Dividend Reinvestment and Stock Purchase Plan under which the Company's stockholders may automatically reinvest their dividends and make optional cash payments for the purchase of the Company's Common Stock.

Sales of Common Stock for 1994 and 1993 are summarized below (in thousands of dollars):

	<u>1994</u>		<u>1993</u>	
	<u>Shares</u>	<u>Amount</u>	<u>Shares</u>	<u>Amount</u>
Balance at January 1.....	<u>52,757,545</u>	<u>\$544,609</u>	<u>50,888,130</u>	<u>\$508,202</u>
Employee Investment Plan (401-K).....	272,278	4,302	165,335	3,216
Dividend Reinvestment Plan .....	1,390,873	21,692	1,127,680	21,779
Periodic Offering.....	-	-	576,400	11,412
Total Issues .....	<u>1,663,151</u>	<u>25,994</u>	<u>1,869,415</u>	<u>36,407</u>
Balance at December 31 .....	<u>54,420,696</u>	<u>\$570,603</u>	<u>52,757,545</u>	<u>\$544,609</u>

**NOTE 9. LEASES**

The Company has entered into several lease arrangements involving various assets, with minimum terms ranging from eleven months to seventeen years and expiration dates from 1995 to 2011. The lease provisions obligate the Company to sell on behalf of the lessor or purchase the associated asset at a specified percentage of the asset's fair value if the lease is not renewed. Rent expense for the years ended December 31, 1994, 1993 and 1992 was \$2.3 million, \$1.9 million and \$1.8 million, respectively. Future minimum lease payments (thousands of dollars) required under operating leases that have initial or remaining noncancelable lease terms in excess of one year as of December 31, 1994 are estimated as follows:

Year ending December 31:	
1995	\$ 8,424
1996	7,283
1997	6,872
1998	1,847
1999	2,257
Later years	<u>27,086</u>
Total minimum payments required	<u>\$ 53,769</u>

The Company also has various other operating leases, which are charged to operating expense, consisting of a large number of small, relatively short-term, renewable agreements for various items, such as office equipment and office space.

**NOTE 10. DISCONTINUED COAL MINING OPERATIONS**

Washington Irrigation & Development Company (WIDCo) owned an undivided one-half interest in coal mining properties near Centralia, Washington, which it operated and which supplied coal to the Centralia Steam Electric Generating Plant owned 15% by the Company. On July 31, 1990, WIDCo sold its 50% interest in the Centralia coal mining properties for \$40.8 million. Net income of \$2.4 million in 1992 resulted from accounting adjustments and a refund of federal income taxes for years prior to the sale. The consolidated financial statements have been reclassified to reflect the continuing operations of the Company. The revenues, expenses, assets and liabilities of the discontinued operations have been reclassified from those categories and netted into single line items for discontinued operations in the Balance Sheets and Income Statements.

**NOTE 11. COMMITMENTS AND CONTINGENCIES**

*Supply System Project 3*

In 1985, the Company and the Bonneville Power Administration (BPA) reached a settlement surrounding litigation related to the suspension of construction of Washington Public Power Supply System (Supply System) Project 3. Project 3 is a partially constructed 1,240 MW nuclear generating plant in which the Company has a 5% interest. Under the settlement agreement, the Company receives power deliveries from BPA from 1987 to 2017 in proportion to the Company's investment in Project 3.

The only material claim against the Company arising out of the Company's involvement in Project 3, which has been pending since October 1982 in the United States District Court for the Western District of Washington (District Court), is the claim of Chemical Bank, as bond fund trustee for Supply System Projects 4 and 5, against all owners of Projects 1, 2 and 3 for unjust enrichment in the allocation of certain costs of common services and facilities among the Supply System's five nuclear projects. Projects 4 and 5 were being constructed adjacent to Projects 1 and 3, respectively, under a plan to share certain costs. Chemical Bank was seeking a reallocation of \$495 million in costs (plus interest since commencement of construction in 1976) originally allocated to Projects 4 and 5.

## THE WASHINGTON WATER POWER COMPANY

On January 24, 1995, the Company executed a Memorandum of Understanding (MOU) which is intended to settle all remaining claims in the "cost sharing" litigation. The other parties to the MOU are expected to include Chemical Bank, as trustee for the holder of Supply System Projects 4 and 5 bonds; the Supply System; BPA; certain public utility participants in those projects; and Puget Sound Power & Light Company (Puget), and Portland General Electric Company (PGE), Puget and PGE being two of the other three investor-owned utilities which held minority ownership interests in Project 3.

The MOU provides for the Company to pay \$500,000 in settlement of all claims, and as part of a total \$55,000,000 payment to Chemical Bank. In the MOU, the Company also agrees to give up any claims relating to the Company's bridge loans made to the Supply System in 1981. In exchange, the Company would be released from all pending cost-sharing litigation claims. The MOU contemplates and provides agreement on consolidation of the Project 5 and Project 3 sites for site restoration purposes, if BPA and the Supply System decide to thus consolidate the site. In the event that occurs, the Company would be completely indemnified from any additional costs by a separate agreement with BPA. Under the MOU, the Company's payment to Chemical Bank is due in July, 1995, and it is expected that a final settlement agreement and dismissal of the litigation will occur before or contemporaneously with that payment.

### *Nez Perce Tribe*

On December 6, 1991, the Nez Perce Tribe filed an action against the Company in U. S. District Court for the District of Idaho alleging, among other things, that two dams formerly operated by the Company, the Lewiston Dam on the Clearwater River and the Grangeville Dam on the South Fork of the Clearwater River, provided inadequate passage to migrating anadromous fish in violation of rights under treaties between the Tribe and the United States made in 1855 and 1863. The Lewiston and Grangeville Dams, which had been owned and operated by other utilities under hydroelectric licenses from the Federal Power Commission (the "FPC", predecessor of the FERC) prior to acquisition by the Company, were acquired by the Company in 1937 with the approval of the FPC, but were dismantled and removed in 1973 and 1963, respectively. The Tribe initially indicated through expert opinion disclosures that they were seeking actual and punitive damages of \$208 million. However, supplemental disclosures reflect allegations of actual loss under different assumptions of between \$425 million and \$650 million.

Discovery had been stayed pending a decision by the Court on a case involving some similar issues brought by the Tribe against Idaho Power Company. The Court has since decided these issues and has dismissed all claims against Idaho Power. The Idaho Power case has now been appealed by the Nez Perce Tribe to the Ninth Circuit Court of Appeals. On November 21, 1994, the Company filed its Motion and Brief in Support of Summary Judgment of Dismissal. The Nez Perce Tribe has filed a reply brief, and has requested oral argument. No hearing on the Company's Motion for Summary Judgment has been scheduled by the Court and the matter is not set for trial. The Company is presently unable to assess the likelihood of an adverse outcome in this litigation, or estimate an amount or range of potential loss in the event of an adverse outcome.

### *Little Falls Project*

Pending before the U. S. District Court in the Eastern District of Washington is the case of Spokane Tribe of Indians v. WWP, which was filed in 1982. This matter involves a claim of the Spokane Tribe of Indians for damages arising out of the Company's Little Falls Hydroelectric Development that was constructed on the Spokane River pursuant to a 1905 Act of Congress. The Tribe claimed the Company's dam interfered with Indian fishing rights and sought a declaratory judgment and quiet title to part of the property comprising the Little Falls Hydroelectric Development. However, the Company, the Tribe and the Bureau of Indian Affairs signed a settlement agreement on September 9, 1994. The Secretary of the Interior and the Tribe have executed an irrevocable easement and license to WWP to the property comprising the Little Falls Hydroelectric Development. The lawsuit has been dismissed with prejudice. The settlement agreement provides for an initial payment of \$1.0 million to the Tribe plus an additional \$3.2 million to be paid over the next five years for fish and wildlife enhancement projects. An accrual of \$4.2 million was made during June 1994 and is reflected in the Company's financial statements. Annual payments will also be made to the Tribe, which will be tied to generation at the Little Falls Project and escalate at the rate of 4.1 percent per year, with the first installment of \$375,000 expected to be made by mid-April 1995.

*Oil Spill*

The Company recently completed an updated investigation of an oil spill that occurred several years ago in downtown Spokane at the site of the Company's steam heat plant. The Company purchased the plant in 1916 and operated it as a non-regulated plant until it was deactivated in 1986 in a business decision unrelated to the spill. After the Bunker C fuel oil spill, initial studies suggested that the oil was being adequately contained by both geological features and man-made structures. The Washington State Department of Ecology (DOE) concurred with these findings. However, more recent tests confirm that the oil has migrated approximately one city block beyond the steam plant property. On December 6, 1993, the Company asked the DOE to enter into negotiations for a Consent Decree which will provide for additional remedial investigation and a feasibility study. The Consent Decree, entered on November 8, 1994, provided for 22 additional soil borings to be made around the site, which have been completed. In December 1993, the Company established a reserve of \$2.0 million, and in December 1994 increased it to \$3.1 million based on more current estimates.

*Firestorm*

On October 16, 1991, gale-force winds struck a five-county area in eastern Washington and a seven-county area in northern Idaho. These winds were responsible for causing 92 separate wildland fires, resulting in two deaths and the loss of 114 homes and other structures, some of which were located in the Company's service territory. Four separate class action lawsuits were filed against the Company by private individuals in the Superior Court of Spokane County on October 13, 1993. These suits concern fires identified as Midway, Golden Cirrus, Nine Mile and Chattaroy. All of these suits were certified as class actions on September 16, 1994, and bifurcated for trial of liability and damage issues by order of the same date. The Company's Motion for Reconsideration was denied on October 21, 1994, and a Motion for Discretionary Review of the Court's decision on certification of class actions was timely filed with the Washington Court of Appeals (Division III) on November 14, 1994.

The Company was also served with two suits in Spokane County Superior Court filed on April 20, 1994 and on September 15, 1994, both of which sought individual damages from separate fires within the Chattaroy Fire complex. Five additional and separate suits were brought by Grange Insurance Company, and were filed in Spokane County Superior Court on October 10, 1994, for approximately \$2.2 million paid to Grange insureds for the same fire areas. Two additional class action suits were also filed - one in Lincoln County Superior Court, filed on October 14, 1994, for a fire known as "Nine Mile West" (previously included in the Spokane County Nine Mile suit certified as a class action), and the second in Spokane County Superior Court, filed on October 14, 1994, for the Ponderosa Fire area (which had not been the subject of previous suit). Neither of these suits has yet been certified as a class action, although the Lincoln County suit has been transferred to Spokane County pursuant to decision of the Lincoln County Superior Court on February 21, 1995.

Complainants in all cases allege various theories of tortious conduct, including negligence, creation of a public nuisance, strict liability and trespass; in most cases, complainants allege that fires were caused by electric distribution lines downed by the wind. The lawsuits seek recovery for property damage, emotional and mental distress, lost income and punitive damages, but do not specify the amount of damages being sought. Since little discovery has been conducted and the classes are not yet formed, the Company is presently unable to assess the likelihood of an adverse outcome or estimate an amount or range of potential loss in the event of an adverse outcome. The Company was previously presented with a claim from the Washington State Department of Natural Resources (DNR) for fire suppression costs associated with five of these fires in eastern Washington. The total of the DNR claim was \$1.0 million. On July 22, 1993, the Company entered into a settlement with the DNR whereby the Company agreed to pay \$200,000 to DNR in full settlement of any and all DNR claims; however, there was no admission of liability on the part of the Company.

**THE WASHINGTON WATER POWER COMPANY**

***Williams Lake Lawsuit***

On February 2, 1995, a lawsuit was commenced in Spokane County Superior Court against the Company and its subsidiary, Pentzer, by Tondu Energy Systems, Inc. and T.E.S. Williams Lake Partnership alleging contract violations, conspiracy, misrepresentation and breach of fiduciary duties in regard to the 1993 sale of Pentzer Energy Services, Inc. to B.C. Gas, Inc. The suit claims damages in excess of \$10 million, plus exemplary damages, prejudgment interest, costs and attorneys' fees. Also named as defendants are B.C. Gas, Inc., Inland Pacific Energy (Williams Lake) Corp. and the former Pentzer Energy Services, Inc., subsidiaries involved in the sale, WP Energy Company, WP Energy Canada, Ltd. and WP Energy Canada (Williams Lake) Ltd. The claims involve an alleged first right to purchase interests in the Williams Lake, British Columbia wood-fired generating station. Discovery with regard to the lawsuit has not yet commenced. The Company and Pentzer intend to vigorously defend against all of the claims.

***Other Contingencies***

The Company has long-term contracts related to the purchase of fuel for thermal generation, natural gas and hydroelectric power. Terms of the natural gas purchase contracts range from one month to five years and the majority provide for minimum purchases at the then effective market rate. The Company also has various agreements for the purchase, sale or exchange of power with other utilities, cogenerators, small power producers and government agencies. For information relating to certain long-term purchased power contracts, see Note 13.

**NOTE 12. JOINTLY-OWNED ELECTRIC FACILITIES**

The Company is involved in several jointly owned generating plants. Financing for the Company's ownership in the projects is provided by the Company. The Company's share of related operating and maintenance expenses for plants in service is included in corresponding accounts in the Consolidated Statements of Income. The following table indicates the Company's percentage ownership and the extent of the Company's investment in such plants at December 31, 1994:

<u>Project</u>	<u>KW of Installed Capacity</u>	<u>Fuel Source</u>	<u>Ownership (%)</u>	<u>Company's Current Share of</u>			<u>Construction Work in Progress</u>
				<u>Plant in Service</u>	<u>Accumulated Depreciation</u>	<u>Net Plant In Service</u>	
Centralia.....	1,330,000	Coal	15%	\$ 55,112	\$31,173	\$ 23,939	\$930
Colstrip 3 & 4.....	1,556,000	Coal	15	269,460	80,181	189,279	-

(Thousands of Dollars)

**THE WASHINGTON WATER POWER COMPANY**

**NOTE 13. LONG-TERM PURCHASED POWER CONTRACTS WITH REQUIRED MINIMUM PAYMENTS**

Under fixed contracts with Public Utility Districts, the Company has agreed to purchase portions of the output of certain generating facilities. Although the Company has no investment in such facilities, these contracts provide that the Company pay certain minimum amounts (which are based at least in part on the debt service requirements of the supplier) whether or not the facility is operating. The cost of power obtained under the contracts, including payments made when a facility is not operating, is included in operations and maintenance expense in the Consolidated Statements of Income. Information as of December 31, 1994, pertaining to these contracts is summarized in the following table:

Public Utility District (PUD) Contracts:	Company's Current Share of					Contract Expira- tion Date
	Output	Kilowatt Capability	Annual Costs(2)	Debt Service Costs(3)	Revenue Bonds Outstanding	
(Thousands of Dollars)						
Chelan County PUD:						
Lake Chelan Project.....	100.0% (1)	58,000	\$3,089	\$ 310	\$ 7,628	1995
Rocky Reach Project.....	2.9	37,000	1,093	584	4,354	2011
Grant County PUD:						
Priest Rapids Project.....	6.1	55,000	1,470	1,043	8,001	2005
Wanapum Project.....	8.2	75,000	2,088	1,575	15,287	2009
Douglas County PUD:						
Wells Project.....	3.9	<u>30,000</u>	<u>977</u>	<u>609</u>	<u>7,617</u>	2018
Totals		<u>255,000</u>	<u>\$8,717</u>	<u>\$4,121</u>	<u>\$42,887</u>	

- (1) The Company purchases 100% of the Lake Chelan Project output and sells back to the PUD about 40% of the output to supply local service area requirements.
- (2) The annual costs will change in proportion to the percentage of output allocated to the Company in a particular year. Amounts represent the operating costs for the year 1994.
- (3) Included in annual costs.

Actual expenses for payments made under the above contracts for the years 1994, 1993 and 1992, were \$8,717,000, \$8,721,000 and \$8,433,000, respectively. The estimated aggregate amounts of required minimum payments (the Company's share of debt service costs) under the above contracts for the next five years are \$3,829,000 in 1995, \$3,750,000 in 1996, \$3,616,000 in 1997, \$5,355,000 in 1998 and \$5,392,000 in 1999 (minimum payments thereafter are dependent on then market conditions). In addition, the Company will be required to pay its proportionate share of the variable operating expenses of these projects.

**NOTE 14. ACQUISITIONS AND DISPOSITIONS**

During 1994, Pentzer acquired two companies, one involved in bindery services for the advertising, printing, publishing and direct mail industries and the other in the design and manufacture of panel saws, panel routers and accessories. During 1993, Pentzer acquired three companies, two involved in financial services and one in point-of-purchase display manufacturing. Sales of companies involved in telecommunications, technology and energy services resulted in transactional gains of \$7.1 million in 1993. At December 31, 1994, Pentzer had approximately \$167 million in assets compared to \$130 million at the end of 1993.

In 1992, Pentzer's common stock ownership in ITRON was reduced from approximately 60% to approximately 40% as a result of the issuance of common stock by ITRON in an acquisition. Accordingly, beginning in 1992, Pentzer's share of ITRON's earnings was accounted for by the equity method and was included in Other Income-Net and its investment in ITRON was reflected on the balance sheet under Other Property and Investments. ITRON's initial public offering in November 1993 and Pentzer's sales of ITRON stock during 1993 and 1994 resulted in a reduction in Pentzer's ownership interest to approximately 14%. As a result, Pentzer's investment in ITRON, beginning in December 1994, is accounted for by the cost method.

On December 30, 1994, the IPUC approved the transfer of ownership of all PacifiCorp's electric properties in northern Idaho to the Company. The cash purchase price was approximately \$33 million. The Company commenced operations of the properties on January 1, 1995. The purchase adds approximately 9,800 customers. The Company reduced most customers' rates to 1% below PacifiCorp's current rates and instituted a four-year rate freeze. At the end of the rate freeze, rates will be adjusted to the levels then in effect in the Company's other service areas in northern Idaho. The Company believes this acquisition will not have a material impact on its operating revenues or its results of operations.

#### **NOTE 15. PROPOSED MERGER**

In June 1994, the Company, Sierra Pacific Resources (SPR), Sierra Pacific Power Company, a subsidiary of SPR (SPPC), and Resources West Energy Corporation, a newly formed subsidiary of the Company (Resources West) entered into an Agreement and Plan of Reorganization and Merger, dated as of June 27, 1994, as amended October 4, 1994 which provides for the merger of the Company, SPR and SPPC with and into Resources West. The merger is designed to qualify as a pooling-of-interests for accounting and financial reporting purposes. Under this method of accounting, the recorded assets and liabilities of WWP, SPR and SPPC will be carried forward to the consolidated financial statements of Resources West at their recorded amounts; income of Resources West will include income of WWP, SPR and SPPC for the entire fiscal year in which the merger occurs; and the reported income of the separate corporations for prior periods will be combined and restated as income of Resources West.

The cost savings from the merger are estimated to approximate \$450 million, net of merger transaction and transition costs, over a 10 year period following the consummation of the merger.

The following pro forma condensed financial information combines the historical consolidated balance sheets and statements of income of WWP and SPR after giving effect to the merger. The unaudited pro forma condensed consolidated balance sheet at December 31, 1994 gives effect to the merger as if it had occurred at December 31, 1994. The unaudited pro forma condensed consolidated statements of income for each of the three years in the period ended December 31, 1994 give effect to the merger as if it had occurred at January 1, 1992. These statements are prepared on the basis of accounting for the merger as a pooling-of-interests and are based on the assumptions set forth in the paragraph below. The pro forma condensed financial information has been prepared from, and should be read in conjunction with the Company's historical consolidated audited financial statements and related notes thereto of which this note is a part and SPR's historical consolidated audited financial statements and related notes thereto included in reports filed by SPR pursuant to the Securities Exchange Act, as amended. The information contained herein with respect to SPR and its subsidiaries has been supplied by SPR. The information is not necessarily indicative of the financial position or operating results that would have occurred had the merger been consummated on the date, or at the beginning of the periods, for which the merger is being given effect, nor is it necessarily indicative of future operating results or financial position.

Intercompany transactions (including purchased and exchanged power transactions) between WWP and SPR during the periods presented were not material and, accordingly, no pro forma adjustments were made to eliminate such transactions. For comparative purposes, certain historical amounts have been reclassified to conform to the pro forma condensed financial statement format. The \$450 million net cost savings estimated to be achieved by the merger are not reflected in the pro forma financial statements. All references to per share information for WWP have been adjusted to reflect the two-for-one common stock split which became effective on November 9, 1993. Pro forma per share data and common shares outstanding for Resources West give effect to the conversion of each share of WWP Common Stock into one share of Resources West Common Stock and the conversion of each share of SPR Common Stock into 1.44 shares of Resources West Common Stock.

Income available for common stock.....	65,450	28,149	93,599
Average common shares outstanding.....	49,550	25,709	86,571
Earnings per share.....	\$1.32	\$1.09	\$1.08

**NOTE 16. PROPERTY, PLANT AND EQUIPMENT**

The year-end balances of the major classifications of property, plant and equipment are detailed in the following table (dollars in thousands):

	<u>At December 31.</u>	
	<u>1994</u>	<u>1993</u>
Electric:		
Production .....	\$ 678,356	\$ 643,437
Transmission.....	238,912	228,180
Distribution .....	458,867	433,003
CWIP and other .....	<u>101,863</u>	<u>104,689</u>
Electric total.....	<u>1,477,998</u>	<u>1,409,309</u>
Natural Gas:		
Underground storage.....	14,946	14,686
Transmission.....	3,090	3,060
Distribution .....	253,830	226,894
CWIP and other .....	<u>45,108</u>	<u>32,863</u>
Natural Gas total.....	<u>316,974</u>	<u>277,503</u>
Common plant (including CWIP).....	<u>34,624</u>	<u>36,157</u>
Total utility .....	1,829,596	1,722,969
Non-utility.....	<u>56,466</u>	<u>46,387</u>
Total.....	<u>\$1,886,062</u>	<u>\$1,769,356</u>

32	The Washington Water Power Company has 19 customers with 1994 revenues amounting to \$5,294,164 in the State of Montana. Rates charged were based on the Company's last rate order from the Idaho Public Utilities Commission and accepted by the Montana Commission. The company does not calculate separate rate of return for the Montana jurisdiction.
